Preface
Programme Committee
Additional Referees

Invited Talk: Mobile computing: a research perspective p. 3
A study of bandwidth allocation strategies for interactive image applications p. 17
Stability and optimality of continuous time M-ary rate control mechanisms p. 33
Mean end-to-end packet delays in hybrid integrated services networks p. 52
A modified distributed queueing access protocol for dual unidirectional bus networks p. 72

Implementation of an IEEE 802.6 compliant card for the ISA bus p. 86
Vartalaap: a network based multimedia presentation system p. 107
Communication channels for data multicasting in multi-service networks p. 124
Single and multiple frame video traffic prediction using neural network models p. 146
Protocol test sequence generation using MUIOS based on TSP problem p. 163
Protocol conformance testing - a survey p. 175
EC: a language for distributed computing p. 197
A DSM-based portable distributed programming testbed p. 215
X.500 performance with large databases and OSInet p. 232
A queueing network model of distributed shared memory p. 265
Analysis of buffer management policies in layered software p. 285
On the performance of the unslotted CDMA-ALOHA access protocol for finite number of users, with and without code sharing p. 304
Implementation and performance enhancement of a PC based LAN/WAN router with a differential QoS feature p. 322
Analysis of performance and fault tolerance of database management schemes for PCS p. 337

A new approach for network topology optimization p. 358
Index of contributors p. 373
Keyword index p. 374
