Preface
Introduction: An essay on the role and evolution of data(base) semantics p. 1
Data semantics on the information superhighway p. 11
Value-added mediation in large-scale information systems p. 34
Information visualization: the need for a database approach p. 57
The context interchange network prototype p. 65
Extending a multidatabase manipulation language to resolve schema and data conflicts p. 93

A repository system for business rules p. 119
Description, conversion, and planning for semantic interoperability p. 140
Stepwise refinement of complex object constraints in design views for concurrent engineering p. 167
Compiling a declarative high-level language for semantic integrity constraints p. 188
Maintaining instance-based constraints in the metadata view graph p. 227
Semantic update optimization in active databases p. 253
A customizable model for the semantic of active databases p. 270
Towards a framework for efficient management of potentially conflicting database updates p. 317
Schema translation between heterogeneous data models in a lattice framework p. 345
Flexible design and efficient implementation of a hypermedia document database system by tailoring semantic relationships p. 367
A graphical tool for specifying semantic enrichment of relational databases p. 389
Default reasoning in information systems p. 423
Using cases to build intelligent decision support systems p. 443
Manufacturing systems modeling with roles: a comprehensive approach p. 461
Concept clustering for cooperation in heterogeneous information systems p. 481
Integrated semantics for information and communication systems p. 500
A framework for representation, validation and implementation of databases application semantics p. 526
Maintaining database consistency in the presence of schema evolution p. 549
Metadata extensions to an object-oriented data model for the dynamic capture of engineering design histories p. 573
Panel: Semantics in practical applications - what, when, and how? p. 601
Index of contributors p. 611
Keyword index p. 612
