

List of figures	p. viii
List of boxes	p. xv
List of tables	p. xvi
Preface	p. xvii
Cycles of Climatic Change: Evidence and Explanations	p. 1
The Great Ice Age	p. 3
Introduction	p. 3
Climatic detective work	p. 9
A global perspective	p. 16
Colder and drier, warmer and wetter	p. 23
Summary	p. 27
Further reading	p. 28
Understanding Present and Past Climates	p. 30
Introduction	p. 30
Moving heat around	p. 31
Forcing functions and feedbacks	p. 36
The evidence	p. 43
Understanding climate change	p. 46
Summary	p. 46
Further reading	p. 47
Understanding the Cryosphere	p. 49
Introduction	p. 49
How ice sheets work	p. 50
How do ice sheets get started?	p. 59
The Milankovich theory of ice ages	p. 61
Summary	p. 65
Further reading	p. 66
The Deep Sea Record	p. 67
Introduction	p. 67
Deep sea sediments	p. 67
Oxygen isotope studies	p. 71
Global changes of sea-level	p. 77
Oxygen isotope stages	p. 79
Post-Cretaceous cooling	p. 80
Summary	p. 81
Further reading	p. 82
Revealing the Milankovich Pacemaker	p. 83
Introduction	p. 83
The deep-sea oxygen isotope record	p. 83
Cave deposits	p. 91
Dust, monsoons and Milankovich	p. 93

The record in ice sheets	p. 99
Summary	p. 111
Further reading	p. 112
Evidence for Rapid Climate Change	p. 113
Introduction	p. 113
North Atlantic iceberg armadas	p. 113
Rapid eustatic sea-level changes	p. 120
Greenland ice cores	p. 121
Millennial scale events in the loess record	p. 131
Millennial scale events in the NE Pacific	p. 132
Summary	p. 136
Further reading	p. 138
Explanations	p. 139
Introduction	p. 139
Post-Cretaceous cooling	p. 139
Over the threshold	p. 146
The Mid-Pleistocene revolution	p. 149
The change from 40 thousand year to 100 thousand year cyclicity	p. 150
Millennial-scale climate changes and reorganisations of ocean circulation	p. 153
What next - when will the present interglacial end?	p. 156
Summary	p. 158
Further reading	p. 159
Ecological Change and Human Origins	p. 161
Climate Change and Life on Land	p. 163
Introduction	p. 163
Plants and climate change	p. 164
Insects as climate indicators	p. 172
Climate changes at lower latitudes	p. 174
Changes in deserts	p. 181
Consequences of climate change	p. 183
Summary	p. 185
Further reading	p. 186
The Record of Humanity	p. 187
What is humanity?	p. 187
A fragmentary record	p. 188
The first tools and their users	p. 189
The roots of the human evolutionary bush	p. 193
Culture and human waves	p. 199
The last 500 thousand years	p. 204
Our African ancestry	p. 208
Summary	p. 211

Further reading	p. 213
Changing Environments and Changing Habits	p. 214
Africa's Great Rift	p. 214
Out of the trees	p. 216
Birth pains	p. 218
Times of stress; tools and new opportunities	p. 219
Changing brains and bellies	p. 220
Early human migrations: pathways and barriers	p. 222
Climate and humans	p. 223
Neanderthals and modern humans	p. 224
Modern humans go east	p. 226
The human impact on environments	p. 228
Summary	p. 234
Further reading	p. 235
Human Impact During the Holocene	p. 236
Enter economics: the emergence of agriculture	p. 236
Direct human impact on Holocene environments	p. 240
Forward to the past, quickly?	p. 248
Summary	p. 251
Further reading	p. 252
List of figure sources	p. 253
Index	p. 260
