

Introduction

Computational Intelligence: Recent advances, perspectives and open problems

Forecasting and trading strategies: A survey

Trading and Investments with Traditional Computational Intelligence Techniques

Hidden Markov Models: Financial modelling and applications

Modelling and Trading Financial Time-Series Using Kalman Filters and ARMA Modelling

Trading and Investments with Artificial Neural Networks

Modelling and Trading the Corn/Ethanol Crush Spread with Neural Networks

Trading Decision Support with Historically Consistent Neural Networks

Trading and Investments with Hybrid Evolutionary Methodologies

Modelling and Trading Financial Time-Series Using Adaptive Evolutionary Neural Networks

Portfolio Construction Using Argumentation and Hybrid Evolutionary Forecasting Algorithms

Trading and Investments with Advanced Computational Intelligence Modelling Techniques

Forecasting DAX30 Using Support Vector Machine and VDAX

Ensemble Learning of High-Dimensional Stock Market Data
