A [very brief] review of the historical foundations of sport expertise: an introduction to the handbook
Expert anticipation and pattern perception
Aiming for excellence: the quiet eye as a characteristic of expertise
On attentional control: A dimensional framework for attention in expert performance

Information-movement coupling as a hallmark of sport expertise
How experts make decisions in dynamic time-constrained sporting environments
Movement automaticity in sport
Expertise in the performance of multiarticular sports actions
Breadth and depth of knowledge in expert versus novice athletes
Psychological characteristics of expert performers
Physical qualities of experts
Expert performance in sport: an ecological dynamics perspective
Defining expertise: a taxonomy for researchers in skill acquisition and expertise

Issues in the collection of athlete training histories
Issues in the measurement of anticipation
Eye tracking methods in sport expertise
New methods for studying perception and action coupling
Methods for measuring pattern recall and recognition in sports experts
Capturing group tactical behaviors in expert team players
Methods for measuring breadth and depth of knowledge
Measuring psychological determinants of expertise: dispositional factors
Psychological determinants of expertise: emotional reactivity, psychological skills, and efficacy
Issues in the measurement of physiological and anthropometric factors
Issues and challenges in developing representative tasks in sport
Challenges to capturing expertise in field settings
Genomics of elite sporting performance
Diversification and deliberate play during the sampling years
Psychological characteristics and the developing athlete: the importance of self-regulation
Family and peer influences in the development of sport expertise
Deliberate practice in sport
Development of tactical creativity in sports
Birthdate and birthplace effects on expertise attainment
Career length, aging and expertise
Changing role of coaches across development
The Use of observation as a method to develop expertise in coaching and officiating

Five evidence-based principles of effective practice and instruction
Efficacy of training interventions for acquiring perceptual cognitive skill
The future of sport expertise research: barriers and facilitators in theory and practice
