</table>
Application of digital electro-hydraulic control system p. 285
Comparing partly and fully distributed control systems in a hydraulic mobile crane p. 291
Knowledge-based techniques for fault diagnosis of electrohydraulic drive systems p. 297
An application of a neural network to adaptive control of a servo system p. 303
Intelligent control for electrohydraulic proportional cylinder p. 309
Adaptive control of Mimo electrohydraulic servosystem p. 315
Digital control of an HST system with load cylinder operated by differential pulse width modulation p. 321
An equivalent flow control system with single-chip computer realizing PWM signals p. 327
Adaptive control of secondary regulation system of HST p. 333
Flow ripple reduction in hydrostatic transmission by means of fluid power attenuators p. 341
Factors affecting accurate measurement of fluid borne noise characteristics of fluid power pumps p. 349
A CAD expert system for axial piston pumps p. 355
A new prediction method of operating moment and cylinder pressure of a swash plate type axial piston pump p. 361
Variable displacement axial piston pump: acoustic and functional characterization p. 367
Delta-operator-based adaptive control of a piston pump p. 373
Numerical and experimental flow visualization of unsteady flow in a spool valve p. 379
Visualization of cavitating flow and numerical simulation of flow in a poppet valve p. 385
A study of a position servo system composed of high speed on-off valves p. 391
Influence of drain orifice on poppet valve stability p. 399
A study of characteristics of flow control and pressure control of a PWM controlled logic valve p. 405
Research on improving dynamic characteristics of counter balance valve p. 411
Fuzzy state controller and its application in hydraulic position servo p. 417
Review and progress on flow force of a poppet valve p. 423
Development of a fluidic pump driven by single bistable element p. 429
Development of rotary servo valve p. 435
A new scheme for the electro-hydraulic servo system control of electrodes in an electric arc furnace p. 441
Effect of design parameters on vibrational behaviour of a counter balance valve equipped hydraulic crane p. 447
Investigation of butterfly check valve with optimum closing performance p. 453
On the frequency response characteristics of PWM high-speed on-off valves p. 459
On possibility of suppressing self-excited oscillations of relief and check valves by actions on pipeline performance p. 465
Switching valve operated proportional seat valve with momentum flowmeter p. 471
Simulation study of load sensing dynamics on hydraulic excavator p. 477
Power steering pump energy savings p. 483
Walking control system of drilling platform, extra-shallow sea walking type 'Shenli 2'
p. 489

Continuous pressure control by a new intensifier using an oil hammer
p. 495

Analysis of surge pressure generated by fluid column separation in pressure control system of vehicle
p. 501

Analysis of an electro-hydraulic position control servo-system using transmission-line modelling (TLM)
p. 507

Optimum design of bearing/seal parts for hydraulic equipment on mixed lubrication
p. 515

Siltion of capillary flow passage due to solid particles
p. 521

PCSEX: An expert system for pump contamination sensitivity evaluation
p. 527

Piecewise-linear modeling of hydraulic system for state-feedback control strategy
p. 533

Simulation analysis of pressure fluctuation for hydrostatic driving system of cooling fan
p. 539

Unity between steady and transitional state simulation for hydraulic systems
p. 545

Exploratory development for 3D CAD in hydraulics
p. 551

An accurate checking hole method used in hydraulic manifold CAD
p. 557

Some considerations on the position control of pneumatic cylinders
p. 563

Dynamic characteristics of pneumatic cylinder with variable orifices
p. 569

Modeling pneumatic position servo realized with commercial components
p. 577

Computer "PCM" and learning control for positioning of pneumatic cylinder
p. 583

Study on the condensation of water in a pneumatic system
p. 589

Numerical study of characteristics of pressure reduction of compressed air in a long pipe installing branch pipes
p. 595

Temperature change of air in pneumatic system
p. 601

Fast transients in complex pneumatic circuits
p. 607

Fuzzy logic control in a joystick operated hydraulic crane
p. 613

A study on acceleration waveform control of an electrohydraulic servo system using linear-model-following control
p. 619

Theoretical analysis and experimental research on hydraulic active filtering method
p. 625

Numerical optimization for self-tuning electrohydraulic control systems
p. 631

The thermodynamic method applied to hydraulic transmissions
p. 639

Approximation for pipeline dynamics of hydraulic circuits in numerical simulation
p. 645

A new measurement of the fuel injection rate of diesel engine fuel pump based on transmission line dynamics
p. 651

Practical requirements for modelling the dynamics of hydraulic pipelines
p. 657

Discrete-vortex simulation of two-dimensional and axisymmetric flow in a disk valve
p. 665

Numerical analysis of transient flow through a pipe orifice: time constant for the setting flow
p. 671

Experimental identification and modelling of flow and torque losses in gerotor hydraulic motors
p. 677
Active control of pneumatic vibration isolation table using two degrees of freedom controller p. 683
Grasping a sheet of paper by using pneumatic actuated finger p. 689
Developments of human support instrument in nursing care p. 695
On the development of a new pneumatic versatile gripper p. 701
Attitude control of a two wheeled vehicle model with pneumatic servo type active suspension p. 707
A study on pressure control of a chamber by using an electro-pneumatic pressure proportional valve p. 713
Static characteristics of a pneumatic pressure control proportional valve with nozzle-flapper mechanism p. 719
Advanced opto-pneumatic control system and on-off characteristics of optical actuator p. 725
An effective tuning method of fuzzy controllers in pneumatic servosystem p. 731
Electropneumatic clutch servomechanism and its fuzzy control for automated manual transmission p. 737
Intelligent control of air servodrives using neural networks p. 743
Digital positioning using a set of pneumatic cylinders in case with external load p. 749
Opto-pneumatic control robot arm p. 755
Computer aided hydraulic circuit design system using bondgraph symbols p. 761
Hydraulic simulation technique using modularized modeling method p. 767
Using computer simulation methods in fluid power education p. 773
Author index p. 779
Subject index p. 781
