Preface

Bridge management objectives and methodologies p. 1
Reconstruction and repair of steel highway bridges damaged by the Great Hanshin Earthquake p. 8
An expert system using case-based reasoning for selecting retrofitting methods of fatigue damage on steel bridges p. 17
Prediction of bridge service life using time-dependent reliability analysis p. 26
Reliability based reassessment of an existing concrete bridge - a case study p. 34
Repair of the bascule pier of the Vilsund Bridge p. 45
Investigation, repair and strengthening of a viaduct's steel piers p. 51
The Charmaix Viaduct (Savoy France) pier movements p. 59
Investigation and rehabilitation of Tsing Yi South Bridge, Hong Kong p. 65
Rehabilitation of a historic bridge over the Sand River near Virginia, South Africa p. 73

Friarton Bridge strengthening p. 79
Damage assessment and repair design of Dah Chih Bridge p. 86
Strengthening of Langlebury Lane Bridge, Hertfordshire p. 93
Emergency repairs and replacement of the 'Lange Lobrockstraat' railway bridge p. 101
Repair, rehabilitation and replacement of Galata floating bridge on Golden-Horn p. 108
Bascule bridge machinery rehabilitation at Hutchinson River Parkway Bridge p. 116
Concrete specification for new bridges p. 124
Methodology for the assessment of the structural behaviour of concrete bridges p. 138
Inspection and service life predictions of prestressed concrete cantilever bridges in Slovakia p. 147
Optimisation of maintenance of concrete structures through service life calculation p. 154

Relief of creep/shrinkage stresses in integrally constructed bridges p. 164
Strengthening concrete bridge decks - increasing the shear capacity p. 173
Application of catholic protection to highway viaducts p. 180
Design of innovative concrete bridges for South China p. 188
Evolution of bridge maintenance management systems p. 195
Risk-based approaches to economic appraisal, load assessment and management of bridges: a review p. 203
Bridge management systems: the need to retain flexibility and engineering judgement p. 212

The association of ettringite with the cracking of in-situ bridge concrete p. 219
Assessment of concrete bridges with inadequately anchored reinforcement p. 225
Open spandrel masonry arch bridges p. 233
Assessment and reconstruction of arch structures over the Basingstoke Canal p. 239
Behaviour of skewed brickwork arch bridges p. 247
Preservation and seismic strengthening of Donner Summit arch bridge p. 254
Mass concrete arches p. 263
Arch bridges Nanin and Cascella at the San Bernardino Pass, Switzerland p. 270
Structural modification of the two-hinged arch Semimarau bridge p. 279
Load test on a cast iron jack arch bridge p. 287
Replacement of steel and composite bridges without traffic interruption p. 295
Maintenance, service life and total cost of steel bridges in urban elevated highways p. 304
Field stress measurements of a plate girder bridge carrying a 116 ton truck p. 313
Linearised fatigue assessment procedure for welded components in bridge structures p. 321
Investigation of the vibration behaviour of the Mukogawa exit ramp: a 7-span continuous curved girder bridge p. 327
Evaluation of aluminium bridge systems p. 335
Finite element model optimisation of a large bridge based on dynamic testing p. 343
Possibility of fatigue-free steel girder bridges with simple transverse-stiffening system based on large 3D FEM analysis p. 352
Ultimate capacity analysis of bridges with deteriorated connections or members p. 361
Aesthetic aspects of widening and rehabilitating historic bridges p. 370
Influence of maintenance on the design of highway structures p. 378
Replacement of motorway overbridges maintaining continuous motorway traffic p. 385
Long-term slab-girder interaction in strengthened bridge decks p. 393
A parameter study of the strengthening of reinforced concrete beams with bonded composites p. 400
Road bridges strengthening by epoxy bonded steel plates p. 409
Upgrading reinforced concrete beams by bolting steel side plates p. 412
Peeling failure of reinforced concrete beams with externally bonded steel plates p. 420
Bridge enclosure: facilitating construction, inspection, maintenance, upgrading and operation p. 429
Surface-applied inhibitor in rehabilitation of the Pency Bridge, Geneva, Switzerland p. 437
Surface treatment standards to support owners, consulting engineers, contractors and suppliers p. 444
Assessment of the protection against corrosion provided by repair systems p. 453
Repair materials for civil engineering construction: Belgian experience p. 468
A3/A31 Flyover - case history of an externally post-tensioned bridge p. 473
Evaluation of effects due to creep and shrinkage in existing prestressed concrete girders strengthened by external cables p. 480
Increase of the load-bearing capacity of reinforced concrete bridges by supplementary post-tensioning: Hungarian examples p. 489
Prestressing cables inspection and assessment by means of the reflectometric method (RIMT) p. 495
Non-ferrous prestressing and reinforcement for concrete highway bridges p. 503
On the collapse of a cable-stayed bridge at Nienburg: a Nineteenth Century disaster revisited p. 516
Axial fatigue life prediction of bridge cables p. 523
Replacement of single cables in cable stayed and suspension bridges p. 532
Seismic vulnerability evaluation of the Tacoma Narrows Bridge p. 534
Investigation and load testing of a steel latticed truss viaduct p. 547
Assessment, repairs, and refurbishment of a steel latticed truss viaduct

Captain William Moore Creek bridge rehabilitation

A risk-based framework for assessment and prioritisation of bridges

Development of a bridge management system in Japan

Planning bridge maintenance in Poland using a BMS based on a taxonomic investigation

Information system for management of bridges owned by the Province of Perugia, Italy

Whole life costing in road bridges applied to service life prediction

Effective maintenance of the bridge stock in Finland

Innovative solutions for unusual bridge maintenance problems in South Korea

White Cart Viaduct: inspection, maintenance and design

In service monitoring of A38 Motorway overbridge, Bristol

M1 Motorway, Wilsthorpe Lodge Bridge

Inspection and maintenance facilities for the Thelwall New Viaduct

Assessment of reinforced concrete bridges: collapse tests on Thurloxton Underpass

Supplementary load testing of Mellor Spodden concrete arch bridges

Special inspection of post-tensioned concrete bridges on the M4 Motorway in Berkshire

Assessment and design of unreinforced masonry parapets

Dynamic monitoring as a tool for long span bridges

Potential for friction welding in bridge structures

Durability design: applying data from materials research and deteriorated structures

The use of advanced composite materials in strengthening and maintaining bridges

Strengthening of the Quinton Bridges with externally bonded steel plate reinforcement

A stressmeter for assessing the in-situ stresses in concrete bridge structures

Stress redistribution and structural reserves in prestressed concrete bridges

The assessment of stress resultants and displacements in bridge decks by the use of distribution coefficients

Analysis and assessment of bridges with minimal transverse reinforcement

Traffic load assessment of bridges by permanent stress measurement

Considering actual traffic during bridge evaluation

Durability enhancement of half joints

The mitigation of structure-borne noise on a steel railway bridge using a polyurethane resilient track isolation system

Assessment and rehabilitation of a fractured bascule bridge

New developments on orthotropic steel bridge decks: fatigue tests

The effectiveness of silane for extending the life of chloride-contaminated reinforced concrete

The role of economic evaluation in the bridge management process
