Introduction to Quaternary and living ostracods

A general introduction to ostracods: morphology, distribution, fossil record and applications

The ecology of Ostracoda across levels of biological organisation from individual to ecosystem: a review of recent developments and future potential

Ostracods as palaeoclimate proxies: ecological and biogeographical approaches

Ostracod taxa as palaeoclimate indicators in the Quaternary

Quantitative transfer function approaches in palaeoclimatic reconstruction using Quaternary ostracods

Mutual climatic range methods for Quaternary ostracods

The biogeography and physicochemical characteristics of aquatic habitats of freshwater ostracods in Canada and the United States

Distribution of freshwater ostracods in the Canadian North and implications for palaeoclimatic reconstructions

Ostracods as palaeoclimate proxies: geochemical approaches

The chemical composition of ostracod shells: applications in Quaternary palaeoclimatology

The calibration of environmental controls on trace element ratios in ostracod shell calcite: A critical assessment

Biological and environmental controls on isotopes in ostracod shells

Multi-proxy approaches to Quaternary palaeoclimate studies

The versatility of Quaternary ostracods as palaeoclimate proxies: comparative testing of geochemical and ecological/biogeographical approaches

Ostracods as indicators of climatic and human-influenced changes in the Late Quaternary of the Ponto-Caspian region (Aral, Caspian and Black seas)

Geochemical and palaeoecological analyses of Mid Pleistocene to Holocene ostracod assemblages from Valle di Castiglione (Italy): palaeoenvironmental and palaeoclimatic assessment

Climate Variability during the Medieval Climate Anomaly and Little Ice Age based on ostracod faunas and shell geochemistry from Biscayne Bay, Florida

Quaternary ostracods from the Tibetan Plateau and their significance for environmental and climate-change studies

Holocene lake level changes of Lake Nam Co, Tibetan Plateau, deduced from ostracod assemblages and d18O and d13C signatures of their valves

Future development: potential and limitations of ostracods in Quaternary palaeoclimatology

Palaeogenetics for ostracods (Crustacea, Ostracoda)

Ostracoda as proxies for Quaternary climate change: overview and future prospects
