List of Contributors

Introduction

Retina

Expression of GABA[subscript A] receptors in the vertebrate retina p. 3
The physiology of GABA[subscript A] receptors in retinal neurons p. 29
The physiology of GABA[subscript B] receptors in the vertebrate retina p. 47
Structural organization of GABAergic circuitry in ectotherm retinas p. 61
Functional organization of GABAergic circuitry in ectotherm retinas p. 93
GABAergic circuits in the mammalian retina p. 107
Development of GABAergic neurons in the mammalian retina p. 133

Subcortical visual pathways

GABA[subscript A] and pre- and post-synaptic GABA[subscript B] receptor-mediated responses in the lateral geniculate nucleus p. 151
GABAergic circuits in the lateral geniculate nucleus of the cat p. 171
Inhibitory GABAergic control of visual signals at the lateral geniculate nucleus p. 193
The organization of GABAergic neurons in the mammalian superior colliculus p. 219
The distribution and function of gamma-aminobutyric acid (GABA) in the superior colliculus p. 249
Behavioural consequences of manipulating GABA neurotransmission in the superior colliculus p. 263
GABAergic neurons and circuits in the pretectal nuclei and the accessory optic system of mammals p. 283
The pathways and functions of GABA in the oculomotor system p. 307

Visual cortex

GABA[subscript A]- and GABA[subscript B]-mediated processes in visual cortex p. 335
GABA mediated inhibitory processes in the function of the geniculo-striate system p. 349

GABAergic networks of basket cells in the visual cortex p. 385
Lateral inhibitory interactions in areas 17 and 18 of the cat visual cortex p. 407
The synaptic inputs to simple cells of the cat visual cortex p. 423
GABA-mediated inhibition in the neural networks of visual cortex p. 443
Organization and plasticity of GABA neurons and receptors in monkey visual cortex p. 477

Molecular properties of GABAergic local-circuit neurons in the mammalian visual cortex p. 503
Development of GABA-containing neurons in the visual cortex p. 523
Subject index p. 539
