List of Contributors

Preface

Acknowledgement

E. Scharrer-W. Bargmann Memorial Lecture

Brain secretory peptides of the silkworm Bombyx mori: Prothoracicotropic hormone and bombyxin

Evolutionary Aspects of Neuropeptides and their Genes

Structure and evolution of insulin and insulin-like growth factors in chordates

Relationships among the FMRFamide-like peptides

Molecular evolution of neurohypophysial hormone precursors

A vasopressin-related peptide in the mollusc Lymnaea stagnalis: Peptide structure, prohormone organization, evolutionary and functional aspects of Lymnaea conopressin

Molecular Biology of Neuropeptides - Regulation of Neuropeptide Genes

Models for the study of cell-specific neuropeptide gene expression

Neuropeptide gene expression in transgenic animals

Spatiotemporal patterns of transcription factor gene expression accompanying the development and plasticity of cell phenotypes in the neuroendocrine system

Alternative mRNA splicing in the nervous system

Regulation of vasopressin and oxytocin gene expression by estrogen and thyroid hormones

The peptidergic nervous system of coelenterates

Mutant vasopressin precursor producing cells of the homozygous Brattleboro rat as a model for co-expression of neuropeptides

Purification of a new neuropeptide from locust corpus cardiacum which influences ileal transport

Differentiation and Development of Peptidergic Neurons

Molecular genetic analysis of the FMRFamide-related neuropeptides in Drosophila

Somatostatin: A putative neurotropic factor with pleiotropic activity in the rat central nervous system

Topographical displacement of neuropeptide-producing nuclei as an indicator of evolutionary brain development

Receptors and Peptide Analogues

Molecular biology of G-protein-coupled receptors

Strategies in the development of peptide antagonists

Antibodies to neuropeptides as alternatives for peptide receptor antagonists in studies on the physiological actions of neuropeptides

Processing, Transport and Release

The biosynthesis and processing of neuroendocrine peptides: Identification of proprotein convertases involved in intravesicular processing

Synexin (annexin VII) and membrane fusion during the process of exocytotic secretion

Routing and release of input and output messengers of peptidergic systems

Membrane Physiology and Second Messenger Systems

Signal transduction in the neurohypophyseal compartments
