Bordeaux, Athens, Kyoto

Foreword

Committees

The New Industrial Challenge: Towards a Lean Production p. 3
An IMS Test Case - Global Manufacturing p. 11
Knowledge-Based Optimization of CIM-Systems Using Industry-Specific Reference Models p. 21
Manufacturing Philosophy for the New European Factory p. 31
The Greening of Products and Production. A New Challenge for Engineers p. 39
Simultaneous Achievement of Cost Leadership and Differentiation by Strategic Production Organization p. 47
Manufacturing Industry Benchmarking p. 57
Possible Approach to Development of a Model for Production Control from the Productivity Aspect p. 65
Managing Production in a Multi-Site Environment: The Evaluation of Factories and Corporate Performance by Means of Knowledge Based Decision Support Systems p. 73

Human Integration in Intelligent Supervisory Control System for Dynamic Discrete Manufacturing Processes p. 81
Knowledge-based System for the Selection of Production Planning and Control Software p. 91

A Monitoring System for Decision Support in Procurement and Materials Management p. 107
An Expert System Approach for the Stock Control of Spare Parts with Low and Intermittent Demand Patterns p. 117

On Lead Time Management in Inventory Models p. 125
A Decision Support System for the Dynamic Planning of Customer Order Intake and Capacity Resources for Make-to-Order Companies p. 133
A Methodology and Simulation of Workload Control in Cellular Manufacturing p. 143
Analysis of a Warehouse System with the Use of Computer Simulation p. 153
Improving Integration in Manufacturing Systems p. 161
Computational Parallels Between Office Systems and Production Management Systems p. 169
Flexible Order-In Production Planning System p. 177
One-Machine Scheduling with Setup Times: Fast Solutions and Applications p. 185
A KEE-SIMKIT Application for the Development and Analysis of Scheduling Policies for Flexible Manufacturing p. 193
An Integrated Multi-Product Dynamic Production Planning Model p. 201
Games in Production Management p. 209
A Framework for Improving Simulation of Manufacturing Systems p. 217
Shop-Floor Monitoring and Control Systems: Some Lacks to Fill Up... p. 227
On-Line Shop Floor Supervision and Control and its Supporting Infrastructure p. 235
Towards a Simultaneous Design of the Part and the Fixture p. 243
