List of contributors

Preface

Designation of schematic structure of gangliosides and allied glycosphingolipids

Molecular basis of cell adhesion (Plenary lecture)

Structure and metabolism of gangliosides

Ganglioside metabolism: enzymology, topology and regulation

Developmental regulation of ganglioside metabolism

New mass spectral approaches to ganglioside structure determinations

Principles of glycosphingolipid-oligosaccharide constitution

Gangliosides in neuronal differentiation and development

Ganglioside turnover and neural cells function: a new perspective

Gangliosides as modulators of neuronal calcium

Cell adhesion molecule (NCAM and N-cadherin) dependent neurite outgrowth is modulated by gangliosides

Significance of ganglioside-mediated glycosignal transduction in neuronal differentiation and development

Ca^2+-ganglioside-interactions in neuronal differentiation and development

Receptor and cell surface activities of gangliosides

A GM1-ganglioside-binding protein in rat brain

Receptors for cholera toxin and Escherichia coli heat-labile enterotoxin revisited

Carbohydrate ligands of leukocyte adhesion molecules and their therapeutic potential

Receptors for gangliosides and related glycosphingolipids on central and peripheral nervous system cell membranes

Gangliosides and cancer

Potential of genetically engineered anti-ganglioside GD2 antibodies for cancer immunotherapy

Ganglioside phenotype of human gliomas in vivo and in vitro

Gangliosides associated with primary brain tumors and their expression in cell lines established from these tumors

Role of gangliosides in tumor progression

Tumor gangliosides as targets for active specific immunotherapy of melanoma in man

Gangliosides and peripheral neuropathies

Gangliosides and peripheral neuropathies: an overview

The structure of human anti-ganglioside antibodies

Antibodies to glycoconjugates in neuropathy and motor neuron disease

Gangliosides and related glycoconjugates in myelin: relationship to peripheral neuropathies

Antiglycolipid antibodies and peripheral neuropathies: link to pathogenesis

Gangliosides and functional recovery of injured nervous system

CNS pharmacology of gangliosides

Cooperative effects of gangliosides on trophic factor-induced neuronal cell recovery and synaptogenesis
