Regulation of transcription from the cytomegalovirus major immediate early promoter by cellular and viral proteins

Mechanisms of transactivation of cellular promoters by the HCMV major immediate early proteins involve direct interaction with cellular transcription factors

Role of CCAAT box-binding protein in an early promoter activation of human cytomegalovirus

Cytomegalovirus maturational proteinase: Site-directed mutagenesis used to probe enzymatic and substrate domains

Human cytomegalovirus encoded proteins: Application of basic research to the diagnosis and treatment of HCMV infection

Rapid detection of mutations within the human cytomegalovirus (HCMV) gene UL97 from p. 37 clinical specimens and isolates

Mutational analysis of antigenic domain 1 (AD-1) of glycoprotein GP58 of human cytomegalovirus

Expression and localization of the HCMV UL80-encoded protease in mammalian cells

Global comparison of the DNA sequences of HCMV (AD169) and MCMV (Smith) - Preliminary analysis

Human cytomegalovirus structural proteins: A report of the first nomenclature workshop

Dependence of cytomegalovirus replication on monocyte differentiation

Analysis of human cytomegalovirus in the healthy human carrier

Monocyte-mediated transmission of infections cytomegalovirus among human endothelial monolayers: An in vitro model of virus dissemination

Uterus is a major site of persistent or latent infection of human cytomegalovirus

Reactivation of murine cytomegalovirus from latency

Perturbation of cytokine production by bone marrow stromal cells after cytomegalovirus infection

Alteration in IL-1 alpha and IL-1 beta, G-CSF and GM-CSF secretion by endothelial cells infected with a clinical isolate of HCMV

Induction of cytokines by human cytomegalovirus

Components of the immune response

Presentation of human cytomegalovirus immediate-early (IE1) protein by astrocytoma cells to a CD4[superscript +] T cell clone

Humoral immunity to glycoprotein B in primary and recurrent human cytomegalovirus infections

Lymphocyte-mediated cytotoxicity of endothelial cells infected with cytomegalovirus: Role in graft rejection

Reconstruction of protective CD8[superscript +] cytotoxic T lymphocyte responses to human cytomegalovirus in immunodeficient humans by the adoptive transfer of T cell clones

High incidence of CMV infection following pancreas transplantation

Maternal viremia and congenital CMV infection

Transmission electron microscopic study of circulating cytogenic endothelial cells in patients with an active CMV infection

Molecular diagnostic techniques for CMV infection
CMV PP65 antigen detection in leucocytes compared to CMV DNA amplification from plasma for early diagnosis of CMV infection in kidney transplanted patients

Clinical significance of CMV in bronchoalveolar lavage cells and extracellular fluids in lung allograft recipients p. 201

Cytomegalovirus pathogenesis: Applications of PCR p. 209

Cytomegalovirus (CMV) late mRNA detection in peripheral blood of AIDS patients with CMV visceral diseases p. 219

Human cytomegalovirus (HCMV) DNA detected in plasma by PCR predicts development of HCMV disease in patients with AIDS or following transplantation p. 225

Definitions of cytomegalovirus infection and disease p. 233

Antivirals for cytomegalovirus p. 241

Effectiveness of Foscarnet induction treatment on quantitative HCMV leukoDNAemia in AIDS patients with HCMV retinitis p. 251

The effect of intravenous acyclovir followed by oral acyclovir on CMV infections following bone marrow transplantation: A randomized double-blind controlled trial p. 257

Survival benefit with acyclovir in a controlled trial in AIDS patients p. 263

Strategies for the treatment of cytomegalovirus infections p. 269

Efficacy of HPMPC in the treatment of CMV infections in various animal models p. 279

The safety, pharmacokinetics, and anti-CMV activity of weekly HPMPC in HIV positive patients excreting CMV p. 287

The use of passive immune therapy with intravenous immunoglobulin for the prevention and treatment of cytomegalovirus infections following solid organ and marrow transplantation p. 295

The generation of human anti-cytomegalovirus monoclonal antibodies against the lower matrix protein pp65 and the p52 nuclear DNA-binding phosphoprotein p. 303

Progress in the development of a human cytomegalovirus glycoprotein subunit vaccine p. 311

The human cytomegalovirus MHC class I homologue induces an allospecific cytotoxic T cell response p. 321

In vivo protection studies with MCMV glycoproteins gB and gH expressed by vaccinia virus p. 327

Immunogenetics of the human T cell response to HCMV p. 333

Summary of workshop on immunological interventions p. 341

Index of authors p. 345

Keyword index p. 349
