Preface
Committees
Referees
Application and Services
Invited Speaker: Video coding and network support for multimedia services over ATM networks
Provision of the broadband connectionless data bearer service in N-ISDN
LANs interconnection via ATM: an experimental prototype
Translation of user’s QoS parameters into ATM performance requirements
High time-resolution cell loss measurements of mixed CBR and VBR traffic
on issues related to real-time applications support in the Orbit Gbps ring
A new selective repeat ARQ scheme for multicast communication
Performance evaluation of frame relay based on the packet trains model
Tribune: on the leading edge of broadband testing
Implementation of an ATM network emulator
Switching. A growable folded ATM switching architecture
Performance analysis of an ATM switch based on a three-stage Clos interconnection network under non-uniform traffic patterns
Performance evaluation of the ATM ring-based switching architecture
Traffic. Invited Speaker: Performance modelling and traffic engineering for broadband communication networks
A comparison of models for VBR video traffic sources in B-ISDN
Indices of dispersion and ATM traffic characterization
Analysis of usage parameter control algorithms for ATM networks
Dimensioning a traffic control device in an ATM network
Bandwidth allocation by pricing in ATM networks
A congestion control framework for broadband ISDN using selective window control
The control of network resources for complex B-ISDN services
The management of a pan-European ATM network - the X interface
Table of Contents provided by Blackwell’s Book Services and R.R. Bowker. Used with permission.
