Editors' preface
Conference officers

Experience-based method evaluation and improvement: A process modelling approach p. 1
The specification of business rules: A comparison of selected methodologies p. 29
Contribution to the evolution of information systems p. 47
Reusability-based comparison of requirement specification methodologies p. 63
Object-oriented information systems analysis: Comparative analysis of six object oriented analysis methods p. 85
ISO/IEC draft international standard 12207, software life-cycle processes p. 111
The IDEF standards: process modelling standard p. 121
The Euromethod Deliverable Model and its contribution to the objectives of Euromethod p. 131

Harmonisation of information system modelling and specification techniques p. 151
Situational method engineering for informational system project approaches p. 169
Issues in design methodologies for distributed information systems p. 195
Two level NIAM: A way to get it object-oriented p. 209
Model integration and model execution p. 223
EMM/ODP: A methodology for federated and distributed systems p. 241
