Preface

Light-emitting diodes fabricated with conjugated polymers - recent progress

Electronic and chemical structure of conjugated polymers and their interfaces: experiment, theory and a glance toward the future

Electronic band structure of conjugated polymers

Carrier injection into semiconducting polymers: Fowler-Nordheim field-emission tunneling

Characterization of nonlinear optical properties by hyper-scattering techniques

Is there an interaction at the aromatic site(s) in a metal/polymer interface? An XPS and HREELS review

Scanning tunnelling microscopy of alkylated oligothiophenes at interfaces with graphite

Preparation and properties of highly oriented polytetrafluoroethylene films

Surface, transforms and interfaces; the SMART direction for polymer science

Chemical vapour deposition of poly(1,4-phenylenevinylene) films

Polymeric optochips: splitters, switches and modulators

The evolution of charge-induced gap states in degenerate and non-degenerate conjugated molecules and polymers as studied by photoelectron spectroscopy

Highly ordered ultra-thin [alpha]5-thiophene films on SiO[subscript 2] and Si(100) + O(N[subscript 2]O)

Optical absorption studies of sodium doped poly(cyanoterephthalylidene)

A joint theoretical and experimental study of the aluminium/polyethylene terephthalate interface

Electrode-limited photoinjection at metal/polymer interface

Interface properties of silver electrodes on two-dimensional polypyrrole films

Luminescent structures of porous silicon capped by conductive polymers

Internal photoemission studies of metal/polymer interfaces

XPS analysis of Cu/Teflon interface irradiated by heavy ions

Some chemical and electronic structures of the non-conjugated polymer poly(3,3'-phthalaldylidene-4,4'-biphenylene)

I-V characteristics of the carbon black-filled polyethylene interface with tin electrodes

Interface formation between poly(2,5-diheptyl-p-phenylenevinylene) and calcium: implications for light-emitting diodes

Electronic processes at interfaces involving conducting polymers

Theoretical study of the interaction between sodium and oligomers of poly(p-phenylenevinylene) and poly(p-phenylene)

A density-functional theory study of the aluminum/polythiophene interface

Theoretical modeling of the geometric and electronic structure of polymer/graphite interfaces

Characterization of properties of polymeric light-emitting diodes over extended periods

Synthesis of a polyphenylene light-emitting copolymer

Transient electroluminescence in poly(p-phenylenevinylene) light-emitting diodes
Dynamics of photoexcitations in electric fields in poly(p-phenylenevinylene) diodes

Study of charge carrier injection and luminescence processes in oligothiophene-based light-emitting diodes

Charge transport in organic light-emitting diodes: polaron or holes

Electroluminescence and photoluminescence investigations of the yellow emission of devices based on ladder-type oligo(para-phenylene)

Space charge limited injection into trap-free polymers

Well-organized phthalocyanine Langmuir-Blodgett films incorporated into symmetrical (metal/thin organic film/metal) sandwich structures

Transient electroluminescence of monolayer and bilayer sexithiophene diodes

Inter-layer mixing effect on the transport properties of a dual-layer organic photoreceptor interface

A.c. conductivity of thermally dedoped polyaniline

An investigation of doped polypyrrole by a combination of scanning tunnelling and atomic force microscopes

The charged excitations in thin films of [alpha]-sexithiophene within semi-transparent field-effect devices: investigation by optical spectroscopy of field-induced charge and by photoimpedance spectroscopy

Photoluminescence under selective excitation of thiophene oligomers: relationship to microcrystalline structure

In situ electrochemical ESR investigations of the growth of one- and two-dimensional polypyrrole films

Dielectric properties of calixarene thin films in a large frequency range

N-Allylpyrrole as a bifunctional precursor to electrically conducting and filmable organic polymers: synthesis and preliminary characterization

New substituted polybenzo[c]thiophenes: controlling the n- and p-doping potentials

The photovoltaic effect in a platinum poly-yne

Designing polypyrrole-based sensors: selective electrochemical cation in aza crown ethers

Multi-component polymeric composites

Electrochemical and photoelectrochemical investigations of polybithiophene films

Spectroscopic and electrical investigations of undoped and doped [alpha]-oligothiophene thin films

Changes of conductivity and electrochemical properties of polypyrrole by ion implantation

Structural control of the optical properties of thin films of oligothiophenes

Organized metal/organic film/metal heterostructures: a way towards molecular electronic devices?

Energy formulation for electronic, optical and acoustical applications including interfacial properties and irreversible processes

Poly(3-decylthiophene) as [actual symbol not reproducible] active material in waveguides

Optical and electrical assessment of an electro-optical intensity modulator from the conjugated polymer poly(2,5-dimethoxy-p-phenylenevinylene)

Cascading of second-order processes in quadratic molecular media at the origin of very large cubic effects
