Preface
WEFTA welcome address
Scientific committee
Organizing committee RIVO-DLO
WEFTA award jury
Sponsors
Consumers: Trends and behaviour
Development of farmed smoked eel in accordance with consumer demands
Determinants of the consumption of fish and shellfish in Denmark: an application of the theory of planned behaviour
Consumer motives for buying fresh or frozen plaice - a means-end chain approach
Processing, Packaging and Distribution: Technological developments in the chain
Live capture and starvation of capelin cod (Gadus morhua L.) in order to improve the quality
Preparation of enzymatic hydrolysates from fish wastes
Live transport of crabs and shrimp from Australia - Kuruma shrimp and spanner crabs as physiological case studies
Integrated quality assurance of chilled food fish at sea
Recovery of value-added products from shellfish waste by a lactic acid fermentation process
Upgrading of waste from salmon slaughtereries using a three phase separation process
Processing, Packaging and Distribution: Processing (high pressure and extrusion)
Minimal processing technologies and high pressure treatment
High-pressure treated shrimp cream: microbiological, chemical and sensorial shelf-life evaluation at refrigeration temperature
Gelling of blue whiting muscle under the combined effects of high pressure-time-temperature
Fish extrusion process
Processing, Packaging and Distribution: Map, heating
Studies on gelation of actomyosin and minced muscle of blue whiting (Micromesistius poutassou) and squid (Toradopsis eblanae)
Storage of Mediterranean fresh fish (Boops boops, and Sparus aurata) under modified atmospheres or vacuum at 3 and 10[degree]C
Effect of different concentrations of CO[subscript 2] on Todaropsis eblanae (Lamarck, 1798) and Eledone cirrhosa (Ball, 1841). Biochemical and sensory aspects
Liquid loss and structural changes during heating of fish products as effected by intrinsic and external factors
Biochemical indices of freshness during processing of sardine (Sardina pilchardus (Walb.)) for canning
Distribution of modified atmosphere packaged salmon (Salmo salar) products
Shelf-life of whole cooked shrimp (Pandalus borealis) in CO[subscript 2]-enriched atmosphere
Use of hyperbaric oxygen to extend the shelf-life of cold - stored seabream (Chrysophrys aurata)
Processing, Packaging and Distribution: Effects of chilling and freezing

Evidence for time dependent [alpha]-actinin delocalisation and proteolysis from post mortem fish white muscle (Dicentrarchus labrax and Salmo trutta) p. 247

Influence of early processing (pre-rigor) on fish quality p. 253

Effect of freezing and formaldehyde on solubility of natural actomyosin isolated from cod (Gadus morhua), hake (Merluccius merluccius) and blue whiting (Micromesistius poutassou)

Processing, Packaging and Distribution: Effects of ripening

Formation of biogenic amines during the ripening of anchovy (Engraulis encrasicholus) p. 283

The influence of intestinal proteinases on ripening of salted herring p. 293

Chemical changes during ripening of North Sea herring p. 305

Sardine ripening: evolution of enzymatic, sensorial and biochemical aspects p. 319

DSC, TPA, and CIELAB - tools for quality determination during enzymatic ripening of salted herring p. 331

Processing, Packaging and Distribution: Intelligent processing and information technology

Vision technology: intelligent fish processing systems p. 351

Design and implementation of optimal policies in the thermal processing of canned fish p. 361

Assessment of lipid quality in salmon and trout by quantitative NMR techniques p. 367

Development of quality cost models p. 379

Product modelling in the seafood industry p. 393

Quality management and measurement in the fish industry p. 403

Quality, Safety and Nutrition: Microbiology and quality assurance

Microbiology of fish and fish products p. 413

Predictive microbiological modelling and seafood quality p. 431

Characterization of the prevailing flora of Carno-bacterium spp. growing on CO\[subscript 2\] modified atmosphere packaged rainbow trout (Oncorhynchus mykiss) fillets p. 445

Fate of foodborne pathogens on modified-atmosphere-packaged (MAP) cod and trout p. 455

QACP: the application of HACCP principles to the assurance of fish product quality as well as safety p. 463

Quality, Safety and Nutrition: Advanced (rapid) analytical methodologies

Advanced analytical tools in seafood science p. 479

Can near-infrared spectrometry be used to measure quality attributes in frozen cod? p. 491

DNA typing of fish products for species identification p. 497

Gas sensor and GC measurements of volatile compounds in capelin (mallotus villosus) p. 507

Different methods for measurement of TMAO-ase activity in extracts of fish tissues p. 521

NIR - a rapid method for quality control p. 529

Quality, Safety and Nutrition: Quality and sensory analysis

New developments in sensory analysis for fish and fishery products p. 537
Opportunities for improving the quality of fisheries products

ATP-breakdown products, measured by ion-pair HPLC, in whiting (Merlangius merlangus) during controlled ice-storage quality profile experiments

Volatile amines as freshness/spoilage indicators. A literature review

Quality, Safety and Nutrition: Consumer and health aspects

Nutritional aspects of fish

Influence of sardine oil supplements on fatty acid profile and cholesterol levels in the rat

Coordination of nutritional, health risk and fair trading aspects of fish and fish products for human consumption. The experience of the Swedish National Food Administration

Influence of the smoking technology on the quality of smoked fish regarding undesirable compounds

Marine fish - a source for essential elements?!

Speciation and in vitro bioavailability of selenium in fishery products

Tainting of caged salmon (Salmo salar) as a consequence of the Braer oil spill

WEFTA Seafood Conference 1995: summary of the round table discussion

Ode to durability
