Special Lectures
Diabetes mellitus and atherosclerosis p. 3
Research on insulin and its connections with clinical medicine p. 11
Diabetic nephropathy in Japan p. 15
Non-enzymatic glycosylation of protein and the pathogenesis of diabetic vascular complications p. 21
Epidemiology
An epidemiological survey on diabetes and hypertension p. 29
Family histories of diabetes among Japanese patients with Type 1, Type 2 diabetes and non-diabetic subjects p. 31
Follow up study on 215 diabetics p. 35
Clinical profile of diabetes with history over 30 years p. 39
A two-year follow-up observation on 432 subjects with IGT p. 43
An epidemiological survey on the prevalence of diabetes mellitus in Qinghai province p. 45
Glucose intolerance in elderly people in Japan p. 49
Prevalence and incidence of diabetes mellitus in the Hiroshima area p. 53
Prevalence and background of diabetes mellitus in Okinawa p. 57
Pathophysiology
Prospective research on circulating HLA-DR antigen-bearing T cells in newly diagnosed type I diabetes mellitus p. 63
Molecular genetic study of the etiology of non-insulin dependent diabetes mellitus (NIDDM) in Chinese p. 65
At DNA level definition of HLA class-II antigen by RFLP of DR and DQ p. 69
Determination of genetic polymorphisms of the properdine factor bin patients with IDDM of Wuhan district of China p. 71
Autoantibodies in Japanese insulin-dependent diabetic patients p. 73
Clinical significance of persisting positive islet cell antibodies in patients with insulin-dependent diabetes mellitus p. 77
Prediction and prevention of diabetes in non-obese diabetic (NOD) mice p. 81
Prevention by nicotinamide of cytokine actions on islet cells p. 85
Clinical analysis of A.B cell functions of pancreatic islets in patients with diabetes mellitus p. 89
A study on glucagon and insulin binding to liver cell plasma membranes of normal and streptozotocin-induced diabetic rats p. 93
Experimental study on the effects of CGRP on blood glucose and glucose-regulatory hormones p. 97
The influence of CGRP on blood glucose and some hormones concerned p. 101
Insulin sensitivity and [beta]-cell function in subjects with impaired glucose tolerance and non-insulin dependent diabetes mellitus p. 107
Glycemic control in totally pancreatectomized patients with artificial endocrine pancreas: Metabolic effects of glucagon p. 111
Effect of protein-calorie malnutrition on [beta]-cell cytotoxicity of long term low dose streptozotocin p. 115
The physiological significance of incretin and its role in the pathophysiology of NIDDM p. 119
Ketangling in the treatment of NIDDM and its effect on urinary C-peptide excretion p. 125

CTS of nitrendipine and gliclazide on B-cell function, glucose and lipid metabolism in streptozotocin-induced diabetic rats p. 127

Preliminary study on the relationship between glucose transporter gene RFLP of the Han nationality and NIDDM subjects p. 131

Blood ketone bodies in diabetic ketoacidosis; the relationship to arterial blood pH p. 133

Galactose load in streptozotocin induced diabetic rats p. 137

The cytomorphological changes of smooth muscle cells under different concentrations of glucose p. 141

Leukotrienes production by polymorphonuclear leukocytes or whole blood cells of diabetic patients and the effect of insulin, glucose and arachidonic acid on this production p. 145

Effect of hyperlipidemia with elevated FFA on insulin secretion p. 149

Diabetes and apolipoproteins p. 153

Urinary proteins and red blood cell membrane negative charges in diabetes mellitus p. 155

Effects of insulin-induced hypoglycemia on cerebrovascular permeability in diabetic rats p. 159

Changes of plasma and erythrocyte content of endogenous digitalis-like substances in NIDDM patients p. 163

Level of plasma motilin and its clinical significance in patients with diabetic diarrhea p. 165

In vitro amelioration of diabetic nerve cAMP content and associated Na-K-ATPase activity with PGE1 analogue: Possible role of cAMP in pathogenesis of diabetic neuropathy p. 167

Significance of increased plasma endothelin-1 (ET-1) as a marker of diabetic angiopathy p. 171

Comparison of HbA1c concentration and HbF detection rate between Chinese and Japanese normal adults and diabetic patients p. 175

Fructosamine and plasma proteins p. 177

Isolation and amino-acid composition of Chinese hamster (Cricetulus griseus) p. 181

Effects of culture and freezing on activities of pancreatic islets p. 185

Scale production of porcine islet-like cell clusters (ICC) and xenotransplantation p. 189

Study on amniotic membrane chamber encapsulated pancreatic islet transplantation in diabetes mellitus p. 191

The transplantation of encapsulated rat islets to diabetic mice p. 195

Estimation of body fat by bioelectrical impedance analysis in diabetic patients p. 199

Evaluation of data obtained by a fitness analyzer when obesity in diabetics is examined p. 205

Diabetes and pregnancy: Sorbitol and myo-inositol pathway in diabetic embryopathy p. 209

Japanese obese women with mild glucose intolerance during late pregnancy: Are they hypoinsulinemic? p. 213

Complications

Diabetic neuropathy and its pathogenesis p. 219
CT of hypertension on the incidences of chronic complications in NIDDM - A cross sectional study of 160 cases p. 221
The new clinical approach of diabetic autonomic neuropathy by laser doppler flowmetry of skin blood flow velocity p. 223
Hypoxic depressive ventilatory responses in a patient with severe autonomic neuropathy during congestive heart failure induced diabetic cardiomyopathy p. 229
Corneal sensitivity in diabetes mellitus - Its correlations with the parameters of glycemic control and the duration of diabetes mellitus p. 233
Electric current at acupuncture point and vibratory perception threshold in diabetic patients with neuropathy p. 237
Late potential measured by signal averaged electrocardiogram (SAE) in diabetic patients p. 241
Delayed ABR latencies in streptozocin-induced diabetic rats p. 245
The effect of cilostazol, an antithrombotic agent, on diabetic neuropathy in streptozocin-induced diabetic rats p. 249
Sympathetic nerve function and peripheral circulation in patients with diabetes mellitus - Evaluation on the therapeutic effects of Gosha-Jinki-Gan p. 253
Oral baikalin and liquid extract of licorice (LEL) reduce sorbitol levels in red blood cell, lens and sciatic nerve of diabetic rats p. 257
YED gastric emptying in diabetes mellitus p. 259
Effects of Chinese traditional medicine (Shigyaku-san, Rikkunsi-to) on gastric action potentials in patients with diabetes mellitus p. 261
Kidney function changes prior to the onset of clinical nephropathy in non-insulin dependent diabetic patients p. 267
Clinical significance of determination of urinary albumin, beta 2 microglobulin and Tamm-Horsfall protein in diabetics p. 271
Measurement of trace urinary albumin as index for early detection of diabetic nephropathy assessment by micro-bumintest (Miles Inc.) with handy kit p. 275
Erythrocyte sorbitol-blood glucose (S/G) ratios related to diabetic renal involvement p. 281
The affect of circadian blood pressure in patients diabetic nephropathy - Comparison with non-diabetic hypertensive patients p. 285
Effects of pancreatic elastase on diabetic nephropathy p. 289
Effects of Sairei-to (TJ-114; Kampo medicine) on the micro-albuminuria in clinically stable type II diabetes patients p. 297
Effects of Svate on the kidney function and morphology in STZ-induced diabetic rats p. 301
Effects of rapid blood glucose control on progression of diabetic retinopathy after cataract surgery p. 303
Abnormalities of blood oxygen uptake by extremities and its influential factors in diabetics p. 307
Relationship of atherosclerosis among major vessels in relation to diabetes p. 309
Peripheral vascular disease estimated by ultrasound Doppler equipment in diabetic patients p. 313
The relationship between WCD and RCD and the comparison of their effects of microangiopathy in NIDDM patients p. 317
Alteration of myocardium sarcolemmal integrity in experimental diabetic rats p. 321
Specific diabetic cardiomyopathy in streptozotocin rats p. 323
Effect of insulin therapy on abnormal bone and mineral metabolism in chronic streptozotocin-induced diabetic rat

Diagnosis and treatments
When is the right time to use sulfonylurea compound as a subsidiary therapy for patients with non-insulin dependent diabetes?

A report of the usefulness of TJ-111, Tsumura Seisin-rensi-in as a drug for the control of blood sugar

The beneficial effect of Seishin-renshi-in (Qing-Xin-Lian-Zi-Yin) for NIDDM

Cross-sectional study on blood glucose and plasma concentration of glibenclamide in non-insulin dependent diabetic patients

Clinical evaluation of gliclazide treatment in NIDDM patients

A clinical evaluation of glurenorm in the treatment of type II diabetes

The effect of a new oral antihyperglycemic drug (CS-045) on insulin resistance in Werner's syndrome

CS-045, a new oral anti-diabetic agent, increases insulin-mediated glucose utilization without suppression of glucose production in normal rats

Modified very low calorie diet in obese diabetic patients

Effects of lipid-lowering agents on serum lipoprotein (a) level in non-insulin-dependent diabetes mellitus with hypercholesterolemia

Prevalence of hyperlipidemia in elderly patients with diabetes mellitus and effective treatment with pravastatin (Mevalotin)

A psycho-medical study of trouble-causing of diabetes

Mid-term observation on behavioral changes in dietary habit of diabetics after implementation of a diabetic training program

Therapeutic effect of human insulin in the treatment of adult-onset diabetes mellitus
