Preface
List of Contributors

Regional Tectonics and Basin History

Geodynamic modelling of the Danish Central Trough

A tectonostratigraphic analysis of the southeast Norwegian North Sea Basin

Tectonic modelling of the northern North Sea using program RIFT

Voslash;rling Basin: subsidence and tectonic evolution

The orientation of minor fault plane striae and the associated deviatoric stress tensor as a key to the fault geometry in part of the Moslash;re-Troslash;lde Fault Zone, on-shore central Norway

Extensional tectonic history of the western Barents Sea

Tectonic framework and halokinesis of the Nordkapp Basin, Barents Sea

Interaction between halokinesis and faulting: structuring of the margins of the Nordkapp Basin, Barents Sea region

Seismostratigraphic study of a synrift megasequence, from the Barents Sea, northern Norway

Tertiary uplift and erosion in the Barents Sea; magnitude timing and consequences

On the magnitude of the Late Tertiary and Quaternary erosion and its significance for the uplift of Scandinavia and the Barents Sea

Pleistocene glacial isostasy implications for petroleum geology

The Application of Tectonic and Structural Analysis to Hydrocarbon Accumulation

Structural style and the habitat of hydrocarbons in the North Sea

Restoration of a regional profile across the Magnus Field in the northern North Sea

Patterns in the development of extensional fault-block shapes from comparison of outcrop-scale faults and experimental physical models

Complex hanging-wall deformation above an extensional detachment - example: Gullfaks Field, northern North Sea

Physical changes in fault blocks caused by rotation and their implications for hydrocarbon accumulations

Techniques for the geometrical restoration of sections: an example from the Bjoslash;rnoslash;y Basin, Barents Sea shelf

Numerical Simulation of Jointed and Faulted Rock Behaviour for Petroleum Reservoirs

Footwall uplift during normal faulting - implications for structural geometries in the North Sea

Modelling secondary hydrocarbon migration in Haltenbanken, Norway

Structural Geology on Reservoir and Field Scale

Faulting processes and fault seal

Controls on the development of fractured reservoirs in the Monterey Formation of central California

Reservoir compartmentation by faults in Cormorant Block IV, U.K. northern North Sea

Permeability of natural and simulated fracture patterns

Structure of the Mid-Norway Heidrun Field and its Regional Implications
Characterization of Faulting and Fracturing in Ekofisk Field from Seismic, Core and Log Data
Ula Field: relationship between structure and hydrocarbon distribution?
A frontier basin analysis study based on limited data: the South Mozambique Graben

The Danish North Sea: a basin prognosis
RIFT, a model of sedimentary basin evolution by finite rate, non-uniform, pure shear extension of the lithosphere
Structural styles in thrust belts developed through rift basins: a view from the western Alps
Tertiary decollement thrusting and inversion structures along Billefjorden and Lomfjorden Fault Zones, East Central Spitsbergen
Pre-Cretaceous structural development of the Danish Central Trough and its implications for the distribution of Jurassic sands
Small faults in sandstones from Spitsbergen and Haltenbanken
A study of diagenetic and deformational structures and their relation to fluid flow

Subparallel faults and horizontal-stress orientations: an evaluation of in-situ stresses inferred from elliptical wellbore enlargements
