Advanced Vessels
Keynote Address: Concept to Reality: An Equation for Progress in Advanced Vessels p. 3

Summary of Workshop p. 13

Dynamic Behaviour and Motion Control
Calculation Procedures, Safety Aspects All Vehicle Concepts p. 17
Hydrofoils, Model Tests and Computations p. 27
Power Prediction of Full Scale SWATH Ships p. 37
Dynamic Behaviour and Motion Control of a Submerged Hull and Foil Hybrid Super High Speed Liner p. 49
Study on Basic Performance of the TSL-A p. 55
Dynamic Behaviour and Motion Control (cont.)

Fast Ferry Design p. 63
Experience with Ship Motion Calculations, Procedures, Experiments, and Correlation (All Vehicle Types) p. 71
Behaviour of Catamarans, Foilcatamarans and SES in Waves p. 79
Nonlinear Motions of Fast Ships and the Effect on Operability p. 87
Operability Characteristics of Monohulls and SWATH Vessels p. 95

High Speed Propulsors
Testing Surface Piercing Propellers p. 107
On the Prediction of the Powering Characteristics of Hull-Waterjet Systems p. 115
Application Limits for Propellers at High Speeds p. 121
Application of Waterjets in High-Speed Craft p. 133
Power Transmission Systems for Advanced Ships: The Hydrostatic Powershaft System p. 139

Vessel Comparison and Selection
Background and Considerations for Selection-Shipbuilder for SES p. 145
Practical Considerations in Selection, Shipowner p. 151
Comparative Design Study SES-Monohull p. 157
Selection on Seakeeping p. 165
The Design and Comparison of High-Performance Marine Craft, A Rational Approach to Selection p. 187
The Potential of SWATH Ships p. 197
Dynamic Behaviour: A Comparison Between Hydrofoil and Catamaran p. 207
Station Keeping p. 213
Keynote Address: Design of Floating Production Systems p. 215
Summary of Workshop p. 223

Operational Experience
Development of FPSO Technology for Offshore Australia p. 229
Experience with Mooring Integrity Assessment for Semi-Submersibles p. 243
Lessons from TLP Performance Measurements p. 251
Operational Aspects of Swops over 2-years Service p. 263
Full Scale Experience with Petrojarl I p. 273

Theoretical Developments
Application of Floating Systems in Deep Waters p. 281
Wave Drift Current Interaction on a Tanker in Oblique Waves p. 289
Motion Damping by Slotted Structures p. 297
Recent Advances of a Study on Low Frequency Motions of Moored Floating Structures p. 305
Low Frequency Vertical Forces Acting on a Submerged Body: a Comparison between Theory and Experiments p. 315
Theoretical Developments (cont.)
Theoretical Evaluation of Positioning Capabilities of Surface Ships p. 321
Neural-Net Computing for Dynamic Positioning of Vessels at Sea p. 329
Recent Developments in Simulation and Real Time Control of Dynamic Positioning and Tracking p. 345
Anchor Line Dynamics p. 355
Developments in Flex Riser Analysis p. 361
Statistical Aspects of the Behaviour of Moored Floating Structures p. 373
Design Aspects
Design Tools for the Engineering of Mooring Systems p. 387
Optimization of a Disconnectable Turret Mooring System p. 393
Anchor-Supported DP Operations with Derrick Barge DB102 p. 399
Development of Dynamic Positioning in Relation to Offshore Loading in the Norwegian Sector p. 407
Propulsor-Hull Interaction p. 415
Keynote Address: Propulsor-Hull Interaction; A Review p. 417
Summary of Workshop p. 427
Operational Experience
Hull-Propulsor Interaction Related to Ship Vibrations p. 431
Odense-lindo Experience with Model/Full Scale Correlation on a Series of Panmax Container Ships p. 437
The Integration between Calculations and Model Tests in Investigating the Propeller-Hull Interaction of a Reefer Container Ship p. 441
Research Capabilities - Computational Developments
Numerical Prediction of Nominal Wake for an Appended Ship p. 463
A Study on Manoeuvring Motion Prediction of SWATH Ships p. 475
Effective Wake and its Computational Prediction p. 483
Bull-Pressure Calculation Based on Theoretically Predicted Ship Viscous Wake past an Operating Propeller p. 489
Modelling of Propulsors in Design, Theory and Experiment p. 497
Research Capabilities - Experimental Developments
Possibilities of Model Tests for Energy Saving Devices p. 511
Recent Experience with 3-D LDV Measurements at MARIN p. 521
Experimental Manoeuvring Facilities p. 533
Research on Propeller-Hull Interaction in the Depressurized Towing Tank  p. 539
Fiber Optic LDV Measurements of Transient Propeller Inflow at Ship's Turning  p. 557
Model Tank Testing - the Future?  p. 563
Design Aspects
Recent Experience and Developments in Passenger Ship Performance Capabilities and Hull Forms  p. 567
DREA's Propeller Design and Analysis Experience  p. 579
The Use of Full Scale Results for Selecting Prediction Tools  p. 591
What's Driving the Hydrodynamic Ship Design?  p. 595
Model Test Results of an Optimum Propeller with Endplates and some Practical Aspects of Application
Use of CFD Tools in the Ship Hydrodynamics Design Process  p. 611
Simulator Training: Sense or No(n) Sense?  p. 621
Nautical Simulators  p. 625
Keynote Address: Nautical Simulators - Versatile Tools, but Improvements are still Required  p. 627
Summary of Workshop  p. 635
Research
An Operational Safety Study of a 200m Ro-Ro Newbuilding through the Herrenbrucke Bridge at the River Trave in Germany  p. 639
Manoeuvring Simulation: A Port Planner's Wishes  p. 647
Simulation as a Vehicle for Co-operation in Port Design and Development  p. 651
The First Step to a Comprehensive Probabilistic Design of the Horizontal Dimensions of Inland Waterways  p. 657
Challenges for a Competitive MSCN  p. 667
Research (continued)
Validation: The Ideal and the Real - Some Recent Experiences  p. 671
Models of Manned Ship Operations for the Assessment of Safety  p. 679
Reception of Large Vessels in the Port of Gijon (Spain)  p. 685
Real Time Photo-Realism with Parallel Visual System Technology  p. 691
Track Smoothing by Complete Compatibility Reconstruction  p. 695
Nautical Training
Simulator Training in Integrated Ship Management  p. 709
A Seaman's View of Marine Simulation  p. 713
Hours of Boredom Interspersed with Moments of Terror  p. 721
Pilot Simulator Training Development through Identification of Problems in Pilotage  p. 723
Nautical Training (continued)
Nautical Training at the Royal Netherlands Naval College: Training Ship and Bridge Simulator as Complements  p. 733
Training Simulations and Crew Evaluation for a New Ferry Type  p. 737
Optimizing Dual Purpose Training through Dual Purpose Simulation Equipment and Techniques p. 747
Maritime Training and Simulators, an Established Combination p. 751
Positive and Negative Factors Affecting VTS Simulator Training p. 757
