Preface

Opening lecture

Biochemistry of the amino acids - 1991 p. 3

Evening lecture

Cosmology, amino acids and the origin of life p. 19

Keynote lectures

Premise and frontiers of central amino acid metabolisms in microorganisms and plants

Regulation of Escherichia coli glutamine synthetase p. 27

Biosynthetic pathways of the common proteinogenic amino acids investigated by fractional [superscript 13]C labeling and NMR spectroscopy p. 41

Structure, function, and engineering on gene regulatory proteins, transporters, and enzymes related with amino acids

Altering the specificity of the leucine binding proteins of Escherichia coli p. 49

Molecular premises for development of amino acid production

Characterization of genes that modify maize seed proteins and enhance the amino acid quality of the grain p. 57

Secondary metabolisms of amino acids and peptides

Alkaloids: Biochemistry, physiology and chemical ecology by example of the pyrrolizidine alkaloids p. 65

Amino acid modification in the biosynthesis of thiopeptide antibiotics p. 77

Microbial secondary metabolites and inhibition of oncogene product functions p. 91

Plant non-protein amino acids

Toxic non-coding amino acids in the genus Lathyrus p. 99

L-Canavanine and chemical defense in leguminous plants p. 109

Frontiers and new horizons in mammalian amino acid metabolism and regulation p. 119

Whole body amino acid turnover and regulation

Homeorrhesis and homeostasis: Problems of growth and maintenance p. 133

Urea cycle

Structure and expression of the urea cycle enzyme genes p. 145

Molecular pathology of mammalian amino acid transport

Modulation of pancreatic amino acid transport by secretagogues, diabetes and acute pancreatitis p. 151

Newer aspects of amino acid metabolisms and nutrition

Arginine metabolism and nutrition in man p. 165

Selected topics on mammalian amino acid residue metabolisms

Post-translational modifications: Unique amino acids in proteins p. 183

Mammalian peptides

Current studies on glutathione p. 197

Metabolisms and regulation of amino acids in the brain

Regulation of the neuronal synthesis of neurotransmitters derived from the aromatic amino acids p. 209

Genes of human catecholamine-synthesizing enzymes p. 217
Amino acid transmitters - Physiology, molecular biology, biochemistry, and pharmacology

Structure and function of the AMPA-selective glutamate receptor channel p. 223
Electropharmacology of excitatory amino acids p. 231
New analytical approaches for brain neurotransmitters
Attomole and sub-attomole determination of thiohydantoin derivatives of amino acids by capillary zone electrophoresis separation and laser-based detection p. 239

Functional visualization of brain amino acid neurons
Compartmentation of glutamate and glutamine in brain tissue: An anatomical approach based on quantitative, electronmicroscopic immunocytochemistry p. 249
Modulation and perturbation of brain mechanisms
Excitotoxic action of dietary amino acids p. 259
Brain serotonin depletion and its consequences p. 269
Sensitivity changes to L-amino acid by central and ingestive application in the lateral hypothalamus of rats under L-lysine deficiency p. 283

Short communications
Invertebrate issues
Arginine degradation cascade, a novel energy-yielding system for spermatozoa of the silkworm, Bombyx mori (Bombycidae) p. 295
L-Leucine and D-octopamine as insect neuroactive substances and leads for design of insecticidal chemicals p. 303
The use of amino acid composition data for the chemical taxonomy of the hinge-ligament proteins of molluscan bivalve species p. 309
A free o-bromophenylalanine, and o-, m-, p-bromophenylalanine- and bromohistidine-containing sperm-activating peptides in the extracellular matrix of sea urchin eggs p. 315

Functional expression of silkworm eclosion hormone gene in yeast and baculovirus expression system p. 321
Enzymology and application
Thermostable alanine racemase p. 327
A new enzyme D-aminopeptidase - Structure, function, and application to organic synthesis p. 333
Intermediates in the reaction of E. coli tryptophan indole-lyase p. 337
Biochemical characterization of the Arabidopsis acetohydroxyacid synthase expressed in Escherichia coli p. 343
Histidinol dehydrogenase in higher plants p. 349
Biosynthesis of neurotoxic amino acids in plants p. 355
Metabolism of [beta]-([isoxazolin-5-on-2-yl])-alanine to the neurotoxin ODAP in callus tissue of Lathyrus sativus p. 361
Purification and some properties of cysteine synthases from Lathyrus sativus p. 365
Amino acid derivatives, synthesis, biosynthesis, and analysis
The structure and functions of lipoamino acids in Cytophaga johnsonae p. 371
Synthetic studies on (e)-2-amino-5-phosphono-3-pentenoic acid (APP), a dehydro amino acid in plumbemicine p. 375
Biosynthesis of violacein: Novel metabolisms of tryptophan in Chromobacterium violaceum p. 379

</table>
L-tyrosine potentiates the centrally-mediated anorectic activity of mixed-acting sympathomimetic drugs in hyperphagic rats  p. 529
Elevated CSF tyrosine content in parkinsonism and spinocerebellar degeneration during oral administration of L-DOPA  p. 533
A dopamine-releasing action of 6R-L-erythro-tetrahydrobiopterin  p. 537
A novel role of 6R-tetrahydrobiopterin: Microdialysis and electrophysiological studies  p. 541
Effect of a supplementation of leucine to a high tyrosine diet on the amino acids and catecholamines in serum, retina and brain of rats  p. 547
Effects of phencyclidine on spontaneous and N-methyl-D-aspartate (NMDA) induced dopamine efflux from rat striatal slices superfused in vitro  p. 553
ES-242 compounds, novel NMDA antagonists of microbial origin  p. 557
A new type of calcium-binding protein (cephalocalcin) exclusively localized in the rat central nervous system (CNS): Binding and conformational studies with tryptophan fluorescence and exogenous fluorophores  p. 561
Amino acid metabolizing enzymes  
Tissue-specific expression of the argininosuccinate lyase gene  p. 567
Homeostasis of amino acid pattern  
The hepatic mitochondrial redox potential as a regulatory factor of plasma amino acid profiles  p. 571
Effect of liver L-tryptophan depletion on the uptake of the amino acid into rat liver  p. 575
Arginine  
Amino acid content and its possible implication in reproductive system  p. 579
Glutathione and related issues  
Biosynthesis of leukotriene C[subscript 4]  p. 583
Glutathione S-transferase of a yeast Issatchenkia orientalis  p. 587
Molecular cloning and DNA sequence of Escherichia coli K-12 [gamma]-glutamyltranspeptidase gene, ggt, and excretion of [gamma]-glutamyltranspeptidase  p. 589
Chemical S-thiolation of reduced ribonuclease A with glutathione and cysteine  p. 595
Pathology and therapies with amino acids and derivatives  
Competitive metabolism of branched chain amino acids and ammonia in liver failure: Clinical and experimental studies  p. 599
Nutritional effects of branched chain amino acids on injured rats under conditions of total parenteral nutrition  p. 603
Potential of [gamma]-L-glutamyl-L-cystine and bis-[gamma]-L-glutamyl-L-cystine as a cystine-containing peptide for parenteral nutrition  p. 607
Enhancement of interstitial cell functions by L-carnosine  p. 613
Identification of NAc-HCPC and NAc-[beta]-CEC in the urine of a patient with cystationinuria using liquid chromatography/atmospheric pressure ionization mass spectrometry  p. 615
Preferential increase of nicotinamide methyltransferase activity in the liver of the tumor host  p. 619
Expression of rabbit liver cytochrome P450IIIB in insect cells with the aid of the baculovirus expression vector system  p. 623
Measurement of 3-hydroxyanthranilic acid and anthranilic acid in urine by high-performance liquid chromatography  p. 629
High-performance liquid chromatographic measurement of tryptophan in blood, tissues, urine, and foodstuffs with electrochemical and fluorimetric detections

Nutrition
Nutritional significance of dietary methionine and threonine in rats fed a nonprotein diet
Modulation of glucocorticoid response to rat hepatic [gamma]-glutamyltransferase activity by a low methionine diet
Isolation and characterization of a new cross-linking amino acid "oxodesmosine" from the acid hydrolysate of elastin

Minisymposia
Neuronal Tetrahydrobiopterin issues
Tetrahydrobiopterin update
Enhancement of acetylcholine release in vivo in the rat hippocampus by 6R-L-erythro-tetrahydrobiopterin
The significance of CSF biopterin and neopterin in neurological diseases
Serotonin depletion in mouse gastrointestinal tract caused by inhibition of tetrahydrobiopterin biosynthesis
Dynamic aspects of amino acid turnover in rat cerebral cortex manifested by 6R-tetrahydrobiopterin: In vivo microdialysis study
Positron emission tomography (PET) in basic and clinical researches with positron emitter-labelled amino acids and amines
C-11-labeled L-methionine for cancer diagnosis and treatment evaluation
Changes in receptor binding in vivo and positron emission tomography (PET)
