Preface

Nonnormal Multivariate Distributions: Inference Based on Elliptically Contoured Distributions p. 1

The Present and Future of Bayesian Multivariate Analysis p. 25

Estimation in Semiparametric Models p. 55

Inference of Properties of Sets from Subsets p. 75

An Information Inequality for the Bayes Risk under Truncated Squared Error Loss p. 85

Some Recent Work on Methods for the Analysis of Multivariate Observational Data in the Social Sciences p. 95

Discrete Passive Modelling of Physical Systems Described by Partial Differential Equations p. 115

Error Bounds for Asymptotic Approximations of Some Distribution Functions p. 181

On Applying the Conjugate-Gradient Algorithm to Image Processing Problems p. 209

Selection and Screening Procedures in Multivariate Analysis p. 233

Robust Stability of Two-Dimensional Digital Filters under Coefficient Perturbation p. 263

Stochastic Differential Equations in Infinite Dimensions: A Brief Survey and Some New Directions of Research p. 267

A General Class of Variance Inequalities p. 279

Bispectral Analysis of Non-Stationary Processes p. 295

Some Recent Contributions to Multitarget Tracking p. 319

An Approach to Stochastic Integration (A Generalized and Unified Treatment) p. 347

Multivariate Analysis with Few or Incomplete Observations p. 375

Major Challenges for Multiple-Response (and Multiple-Adjustment) Analysis p. 401

Visualizing Multivariate Data p. 423

Characterisation and Estimation for Multivariate Markov Random Fields by Spectral Methods p. 467
