Preface

Artificial Neural Networks and ARIMA-Models within the Field of Stock Market Prediction - a Comparison

A Decision Support System Building Tool with Fuzzy Logic and its Application to Chart Technical Analysis

Debate I - That Neural Networks are an Applicable Technology Today

Man-Machine Synergy in Action

Knowledge Structuring and Formalization in a Distributed Environment

An Adaptable Reporting Architecture

FIRCO: The Intelligent Transformation of D Fields into A Fields

Debate II - That Classical Software Engineering Methods are Suitable for Developing Adaptive Systems

The Schematic Programming Tool: An Application of A.I. to Software Engineering

Neural Network Futures Trading - A Feasibility Study

An Application of the AQ Machine Learning Methodology on the Stock Market

Prediction of Stock Market Index Changes

Credit Risk and Lending in an Artificial Adaptive Banking System

Consumer Loan Analysis Using Neural Networks

Improving the Neural Network Testing Process

DeTerminator: A Decision Support System and Tool-kit Using the ProFuSE Method

Debate III - That Rule-Based Systems are an Evolutionary Dead-end in the Development of Intelligent Systems

An Expert System for Personal Financial Asset Management Using Analogical, Qualitative and Causal Reasoning

Table of Contents provided by Blackwell's Book Services and R.R. Bowker. Used with permission.
