Preface

Conditions for an efficient photocatalytic activity of TiO$_2$ particles p. 1

Fundamental photoelectrochemistry of TiO$_2$ and SrTiO$_3$ applied to environmental problems p. 19

Size quantization effects in photocatalysis p. 39

Radical mediated degradation mechanisms of halogenated organic compounds as studied by photocatalysis at TiO$_2$ and by radiation chemistry p. 49

Initial rates of TiO$_2$-photocatalysed degradations of water pollutants: Influences of adsorption, pH and photon-flux p. 67

TiO$_2$ mediated photocatalysis using visible light: Photosensitization approach p. 83

The photocatalytic oxidation of propanol by TiO$_2$ p. 95

A method for the determination of quantum yields in heterogeneous systems: The TiO$_2$ photocatalyzed bleaching of methylene blue p. 111

Photocatalysis in water purification: Possibilities, problems and prospects p. 121

Photoassisted oxidation of oil and organic spills on water p. 139

Photocatalytic oxidation of organic compounds and reduction of dioxygen with quantum-sized semiconductors p. 155

The role of hydroxyl radicals in the photocatalyzed detoxification of organic pollutants: Pulse radiolysis and time-resolved diffuse reflectance measurements p. 163

Effect of crystal form of TiO$_2$ on the photocatalytic degradation of pollutants p. 169

The TiO$_2$-mediated photocatalytic degradation of chloroalkenes in water p. 179

Biochemical application of TiO$_2$ photocatalysts p. 193

TiO$_2$ photocatalytic destruction of water aromatic pollutants: Intermediates; properties-degradability correlation; effects of inorganic ions and TiO$_2$ surface area; comparisons with H$_2$O$_2$ processes p. 207

Identifying primary events and the nature of intermediates formed during the photocatalyzed oxidation of organics mediated by irradiated semiconductors p. 225

Photocatalyzed mineralization of non-ionic, cationic, and anionic surfactants at TiO$_2$/H$_2$O interfaces p. 251

Photocatalytic processes for surfactant degradation p. 261

Biological treatment of Kraft wastewater following pretreatment of the extraction waste stream by illuminating titanium dioxide and membranes p. 275

Formation and disappearance of biphenyl derivatives in the photocatalytic transformation of 1,2,4-trichlorobenzene on titanium dioxide p. 291

Photocatalytic detoxification: Novel catalysts, mechanisms and solar applications p. 301

TiO$_2$ advanced photo-oxidation technology: Effect of electron acceptors p. 321

Photocatalysis for aqueous phase decontamination: Is TiO$_2$ the better choice? p. 337

TiO$_2$ photocatalysis for the destruction of organics and the reduction of heavy metals p. 353
Use of TiO\textsuperscript{2} photocatalysis in the treatment of spent electroless copper plating baths p. 365
Removal of low concentration air pollutants through photoassisted heterogeneous catalysis p. 375
Detection of intermediates from the gas-phase photocatalytic oxidation of trichloroethylene p. 387
Titanium dioxide mediated photochemical destruction of trichloroethylene vapours in air p. 393
Photodegradation of trichloroethylene in the gas phase using TiO\textsuperscript{2} porous ceramic membrane p. 405
Photocatalytic air purification on TiO\textsuperscript{2} coated honeycomb support p. 421
Flow reactor studies of TiO\textsuperscript{2} photocatalytic treatment of airborne nitroglycerin p. 435
Mechanistic studies in TiO\textsuperscript{2} systems: Photocatalytic degradation of chloro- and nitrophenols p. 455
Characterization of TiO\textsuperscript{2} used in liquid-phase and gas-phase photooxidation of trichloroethylene p. 473
Photoreactors for purification and decontamination of air p. 481
Modelling, scale-up and design of multiphasic photoreactors p. 495
TiO\textsuperscript{2} photocatalytic treatment of water. Reactor design and optimization experiments p. 511
Mass transfer limitations in a packed bed photoreactor used for phenol removal p. 533
Operation of a solar photocatalytic water treatment system at a superfund site p. 547
Microbiological issues related to drinking water disinfection chemistry: Opportunities for further TiO\textsuperscript{2} research p. 557
Treatment of organic contaminants in air by photocatalytic oxidation: A commercialization perspective p. 573
Treatment of landfill leachates by photocatalytic oxidation using TiO\textsuperscript{2}: A comparison with alternative photochemical technologies p. 579
Treatment of industrial wastewaters by photocatalytic oxidation on TiO\textsuperscript{2} p. 585
The photomineralisation of reactive black 5 sensitised by titanium dioxide: A study of the initial kinetics of dye photobleaching p. 595
TiO\textsuperscript{2}-photosensitized degradation of the insecticide tetrachlorvinphos [(Z)-2-chloro-1(2,4,5-trichlorophenyl) ethenyl dimethyl phosphate)] p. 601
Photocatalytic degradation of atrazine p. 607
Photocatalytic oxidation of multi-component organochlorine mixtures in water p. 613
Photocatalytic decomposition of PCBs in aqueous systems with solar light p. 619
Feasibility of photocatalytic degradation of TNT as a single or integrated treatment process p. 625
Kinetic and radiation studies for the photoreactor design in photocatalytic detoxification processes using TiO\textsuperscript{2} p. 633
Influence of solar irradiation over pentachlorophenol solar photocatalytic decomposition p. 639
Improved photoefficiencies for TiO\textsuperscript{2} photocatalytic reactors through the use of controlled periodic illumination p. 645
Detection of intermediates formed at the surface of photo-excited TiO$_2$ film electrode using microelectrode p. 651

Photocatalytic activity of TiO$_2$ and the formation of radical intermediates p. 659

Dependence of photocatalytic reaction rate on photocatalyst concentration in aqueous suspensions p. 665

Destruction of 2,4-dichlorophenoxyethanoic acid (2,4-D) in water by TiO$_2$-UV, H$_2$O$_2$-UV or direct photolysis p. 683

Photodegradation of pentachlorophenol p. 689

Photocatalytic degradation of some chlorohydrocarbons in aqueous suspensions of MO$_3$/TiO$_2$ (M = Mo or W) p. 695

A comparative study on the direct photolysis and TiO$_2$-mediated photodegradation of 2-chlorophenol in aqueous solutions p. 701

The reactions of isometric 2,4-hexadienes on photoexcited TiO$_2$ p. 707

Evidence for hole mediated oxidative pathways p. 713

The photocatalysis of anatase type TiO$_2$ p. 719

The photocatalytic destruction of gaseous trichloroethylene and tetrachloroethylene over immobilized titanium dioxide p. 727

Photocatalytic abatement of nitrogen oxides p. 733

Control of VOC emissions from air-stripping towers: Development of gas-phase photocatalytic process p. 741

Photocatalyst deactivation: Oxidation of decamethyl-tetrasiloxane, pyrrole, indole and dimethyl sulfide p. 747

Photocatalytic activity of TiO$_2$ thin film under room light p. 753

Direct observation of crystal surface structure of powdery TiO$_2$ photocatalyst by SAD in TEM p. 759

Simple supported photocatalysts p. 765

Fundamental photocatalytic studies on immobilised films of TiO$_2$ p. 771

Solar detoxification of polluted water: Comparing the efficiencies of a parabolic trough reactor and a novel thin-film-fixed-bed reactor p. 777

Photocatalyzed treatment of 4-chlorophenol with immobilized titanium dioxide p. 783

Photocatalytic degradation of chloroform with TiO$_2$ coated glass fiber cloth p. 789

Design issues for solar-driven photocatalytic systems p. 795

Photocatalysis of organic effluents in a falling film reactor p. 801

Physical-chemical characteristics of P-25 making it extremely suited as the catalyst in photodegradation of organic compounds p. 809

Synthesis of TiO$_2$ photocatalysts with high activity by the alkoxide method p. 815

Photocatalytic study of light-induced charge separation in TiO$_2$ particles p. 819
