Spectroscopic Ellipsometry
In situ spectroscopic ellipsometry in molecular beam epitaxy for photonic devices p. 1

In situ spectral ellipsometry for real-time measurement and control p. 9
In situ spectroscopic ellipsometry studies of electron cyclotron resonance (ECR) plasma etching of oxides of silicon and GaAs p. 17
Spectroscopic ellipsometry characterisation of light-emitting porous silicon structures p. 22
In situ studies of semiconductor processes by spectroellipsometry p. 27
Growth mode of ultrathin Sb layers on Si studied by spectroscopic ellipsometry and Raman scattering p. 35
Criteria for the extraction of SIMOX material parameters from spectroscopic ellipsometry data p. 40
Round robin investigation of silicon oxide on silicon reference materials for ellipsometry p. 45
Spectroscopic ellipsometric characterization of Si/Si$_{1-x}$Ge$_x$ strained-layer superlattices p. 52
The influence of nanocrystals on the dielectric function of porous silicon p. 57
Secondary Ion Mass Spectroscopy
Some examples of depth resolution in SIMS analysis p. 62
Process control for III-V semiconductor device fabrication using mass spectroscopy p. 70
Sputter induced resonant ionization spectroscopy for trace analysis in silicon p. 75
Contamination Monitoring
Contamination control and ultrasensitive chemical analysis p. 79
Organic contamination of silicon wafers by buffered oxide etching p. 88
Application of advanced contamination analysis for qualification of wafer handling systems and chucks p. 93
Optical Characterization Techniques
In situ optical spectroscopy of surfaces and interfaces with submonolayer resolution p. 99

Thermal desorption of amorphous arsenic caps from GaAs(100) monitored by reflection anisotropy spectroscopy p. 106
Optical second harmonic generation from the Si(111)-Sb interface p. 111
Surface-sensitive multiple internal reflection spectroscopy as a tool to study surface mechanisms in CVD: the example of UV photodeposition of silicon dioxide and silicon nitride p. 115
Characterization of the Mechanical State of Si Material System
On the assessment of local stress distributions in integrated circuits p. 119
Strain analysis of multilayered silicon-based contact structures p. 126
Joint Session on Single Chamber Processing
In-process control of silicide formation during rapid thermal processing p. 131
In situ ellipsometry for real-time feedback control of oxidation furnaces p. 135
### Photoreflectance of III-V Materials

- Optical characterization of the electrical properties of processed GaAs (p. 143)
- Optical study of band bending and interface recombination at Sb, S and Se covered gallium arsenide surfaces (p. 153)
- Photoreflectance investigation of dry-etch-induced damage in semi-insulating GaAs substrates (p. 158)
- Contactless electromodulation for in-situ characterization of semiconductor processing (p. 163)
- Photoreflectance versus ellipsometry investigation of GaAs/Al[\text{subscript} 0.3]Ga[\text{subscript} 0.7]As MQW's (p. 167)
- Temperature dependence of photoreflectance of strained and lattice-matched InGaAs/InAlAs single quantum wells (p. 172)

### Photoluminescence of Photonic Material Systems

- Optical tools for intermixing diagnostic: application to InGaAs/InGaAsP microstructures (p. 177)
- Characterization of lattice-matched and strained GaInAs/AlInAs HEMT structures by photoluminescence spectroscopy (p. 182)
- Interface characterization of strained InGaAs/InP quantum wells after a growth interruption sequence (p. 187)
- Electric field dependence of allowed and forbidden transitions in In[\text{subscript} 0.53]Ga[\text{subscript} 0.47]As/In[\text{subscript} 0.52]Al[\text{subscript} 0.48]As single quantum wells by room temperature modulation spectroscopy (p. 191)
- Optical characterization of InP/InAlAs/InP interfaces grown by MOVPE (p. 197)
- Temperature dependence analysis of the optical transmission spectra in InGaAs/InP multi quantum well structures (p. 202)

### Characterization of Electronic Properties

- Lifetime and diffusion length inhomogeneity controlled by point and extended defect interaction in n-GaAs LEC (p. 208)
- Mapping of the local minority carrier diffusion length in silicon wafers (p. 213)
- Evaluation of the minority carrier lifetime and diffusion coefficient of cast polycrystalline silicon wafers by the dual mercury probe method (p. 218)
- In-situ quality monitoring during the deposition of a-Si:H films (p. 222)

### FTIR and PL of Silicon Material Systems

- Non-destructive identification of end-of-range damage in ion-implanted and annealed silicon (p. 227)
- Correlation of photoluminescence and nuclear characterization of In-implanted silicon (p. 232)
- Accurate infrared spectroscopy analysis in back-side damaged silicon wafers (p. 236)
- Chemical composition of porous silicon layers studied by IR spectroscopy (p. 240)
- Stoichiometry of oxygen precipitates in silicon (p. 245)
- Optical characterization of semiconductors containing inhomogeneous layers (p. 249)

### Posters

- Nonlinear recombinations in photoreflectance characterization of silicon wafers (p. 255)
- Investigation of the relaxation of excess carriers in SiGe-heterostructures by photothermal measurement (p. 260)
- Epioptic analysis of the initial ordered growth of Au on Si(111) (p. 266)
Diagnostics of the silicon-insulator interface structure by optical second-harmonic generation p. 269

Atomic scale simulation of crystal growth applied to the calculation of the photoemission current p. 273

Potential step imaging of interfaces in MBE-grown structures p. 277

Using the metal-oxide-polsilicon-silicon (MOPS) structure to determine LPCVD polysilicon quality p. 281

Combined low-frequency noise and random telegraph signal analysis of silicon MOSFET’s p. 285

Effect of near-surface damage on C-V measurements of Schottky barrier diodes p. 291

The impact of high-field stressing on C-V characteristics of irradiated gate oxides p. 295

Effects of diffusion-induced defects on the carrier lifetime p. 301

In situ bulk lifetime measurement on silicon with a chemically passivated surface p. 306

Infrared analysis of buried insulator layers formed by ion implantation into silicon p. 312

Electrochemical etching and profiling of silicon p. 316

Author index p. 322

Subject index p. 327
