Preface
My First Monte Carlo Application One-Factor Problems
Mathematical Preparations for the Monte Carlo Method
The Mathematics of Stochastic Differential Equations (SDE)
Alternative SDEs and Toolkit Functionality
An Introduction to the Finite Difference Method for SDE
Design and Implementation of Finite Difference Schemes in Computational Finance
Advanced Finance Models and Numerical Methods
Architectures and Frameworks for Monte Carlo Methods: Overview
System Decomposition and System Patterns
Detailed Design using the GOF Patterns
Combining Object-Oriented and Generic Programming Models
Data Structures and their Application to the Monte Carlo Method
The Boost Library: An Introduction
C++ Application Optimisation and Performance Improvement
An Introduction to Multi-threaded and Parallel Programming
An Introduction to OpenMP and its Applications to the Monte Carlo Method
Excel, C++ and Monte Carlo Integration
Table of Contents provided by Blackwell's Book Services and R.R. Bowker. Used with permission.
