PSTN Basic Infrastructure, Interfaces and Signals
PSTN central office, and DLC
VoIP Overview and Infrastructure
PSTN and VoIP
Typical VoIP deployment example
Network and acoustic interfaces for VoIP
VoIP systems working principles
VoIP Signaling
Voice Compression
Compression codecs
G.711 Compression
Speech redundancies and compression
G.726 or ADPCM compression
Wideband voice
G.729 Family of low bit rate codecs
Miscellaneous narrow and wideband codecs
Codecs and overload levels
Voice quality of codecs
C-source code for codecs
Codecs in VoIP deployment
Generic VAD/CNG for Waveform Codes
VAD/CNG and Codecs
Generic VAD/CNG functionality
Comfort noise payload format
G.711 Appendix-II VAD/CNG algorithm
Power based VAD/CNG
VAD/CNG in low bit rate codecs
Miscellaneous aspects of VAD/CNG
Summary on VAD/CNG
Packet Loss Concealment Techniques
Packet loss concealment overview
Packet Loss concealment techniques
Transmitter and receiver based techniques
Decoder only based PLC techniques
PLC techniques description
PLC for Low bit rate codecs
PLC testing
PLC summary and discussion
Echo Cancellation
Talker and listener echo in PSTN voice call
Naming conventions in echo canceller
Line and Acoustic echo canceller
Talker echo levels and delay
Echo cancellation in VoIP adapters
Echo path
Adaptation filtering algorithms
Echo canceller control functions
Echo cancellation in multiple VoIP terminals
Echo canceller testing
DTMF Detection, Generation, and Rejection
Specifications of DTMF tones
DTMF tones generation
DTMF detection
Goetzel filtering with linear filtering
Tone detection using Teager and Kaiser Energy operator
DFT or FFT processing
DTMF rejection
DTMF RFC2833 processing
DTMF testing
Summary and discussions
Caller ID Features in VOIP
FSK caller ID on PSTN
FSK caller ID data transport protocol
DTMF based caller ID
Country specific caller ID overview
Caller ID in VoIP
Call wait caller ID
Caller ID on FXO interfaces
Summary and discussions
Wideband Voice Modules Operation
Wideband voice examples
Wideband VoIP adapter
Wideband voice summary
Packetization - RTP, RTCP, and Jitter Buffer
Real time protocol (RTP)
RTP control protocol (RTCP)
VoIP Packet impediments
Jitter Buffer
Adaptive Jitter Buffer
Adapting to delay variations
AJB algorithms overview
Adaptive Jitter Buffer implementation guidelines
Fixed Jitter Buffer implementation guidelines
VOIP Voice - Network BIT Rate calculations
Voice compression and bit rate overview
Voice payload and headers
Ethernet, DSL and Cable interfaces for VoIP
VoIP voice packets on DSL interface
VoIP voice packets on Cable interface
Bit rate calculation for different codec
Bit rate with VAD/CNG
Bit rate with RTCP, RTCP-XR, and Signaling
Summary on VoIP bit rate
Clock Sources for VoIP Applications
PSTN systems and clocks
VoIP system clock options
Clock timing deviations relating to V
