Organic Matter in Soils: Pools, Distribution, Transformations, and Function
Extraction, Fractionation, and General Chemical Composition of Soil Organic Matter

Organic Forms of Soil Nitrogen
Native Fixed Ammonium and Chemical Reactions of Organic Matter with Ammonia and Nitrite
Organic Phosphorus and Sulfur Compounds
Soil Carbohydrates
Soil Lipids
Biochemistry of the Formation of Humic Substances
Reactive Functional Groups
Structural Components of Humic and Fulvic Acids as Revealed by Degradation Methods

Characterization of Soil Organic Matter by NMR Spectroscopy and Analytical Pyrolysis

Structural Basis of Humic Substances
Spectroscopic Approaches
Colloidal Properties of Humic Substances
Electrochemical and Ion-Exchange Properties of Humic Substances
Organic Matter Reactions Involving Pesticides in Soil
Index
