Coordinate Conversion and Transformation
Elevation Referencing
Relative Georeferencing
Discrete Georeferencing Systems
Hardware and Communication Technology for GIS Applications
Computers
Networks
Displays
Quantizers
Plotters and Other Output Devices
Basic Software and Databases for GIS
The Foundation Stones of GIS Software
Operating Systems
Communications Between Users and Computers
Database Management Systems
Computer-Aided Design
Multimedia
World Wide Web
User Requirements
Working Environment
Data Collection I
Introduction
Digitizing Maps
Scanning
Manual Digitizing or Scanning
Aerial Photographs and Photo Interpretation
Remote Sensing
Data Collection II
Surveying
Satellite Positioning System
Photogrammetric Mapping
Collection of Attribute Data
Text Data
Data Quality
Selection Criteria
Measuring Accuracy and Precision
Resolution and Sampling Rate
Data Storage Precision
Positional Accuracy
Attribute Data Accuracy
Temporal Accuracy
Logical Consistency
Completeness
Data Quality Overview Elements
Accessibility
Probable Sources of Error
Quality Control
Database Implementation and Spatial Indexing
Database
Distributed Databases
Databases for Map Data and Indexing
Partitioning and Indexing
Database Design
Housekeeping Tools
Introduction
Data-Entry Functions
Importing Existing Digital Data
Organization of Data Storage Operations
Functions for Correcting and Adapting Geometric Data for Further Use
Editing and Correcting Attribute Data
Basic Spatial Analysis
Analysis of Spatial Information
Logic Operations
General Arithmetic Operations
General Statistical Operations
Geometric Operations
Search and Report Generation from Attribute Data
Geometric Data Search and Retrieval
Complex Operations of Attribute Data
Classification and Reclassification
Integrated Processing of Geometry and Attributes
Overlay
Buffer Zones
Raster Data Overlay
Procedures in Integ
