Preface

Dedication

The Man and His Work

Perspective and Background

Genes and Selection: Retrospect and Prospect

Champaign Country, Illinois, and the Origin of Hybrid Corn

The Illinois Long-Term Selection Experiment

The Intellectual Legacy of the Illinois Long-term Selection Experiment

100 Generations of Selection for Oil and Protein in Corn

RELP Variant Frequency Differences among Illinois Long-term Selection Protein Stains

Physiological Changes Accompanying Long-term Selection for Grain Protein in Maize

Single Kernel Selection for Increased Grain Oils in Maize Synthetics and High-oil Hybrid Development

Biological and Theoretical Models

Population- and Quantitative-Genetic Models of Selection Limits

Mutational Variation and Long-term Selection Response

Population Size and Long-term Selection

Gene Interaction and Selection

Marker-assisted Selection

Long-term Selection with Known Quantitative Trait Loci
