

| | |
|--|---------|
| Preface to the Fourth Edition | p. xv |
| Preface to the First Edition | p. xvii |
| Symbols and Definitions | p. xix |
| Introduction to Polymer Science | p. 1 |
| From Little Molecules to Big Molecules | p. 2 |
| Molecular Weight and Molecular Weight Distributions | p. 4 |
| Major Polymer Transitions | p. 8 |
| Polymer Synthesis and Structure | p. 10 |
| Cross-Linking, Plasticizers, and Fillers | p. 18 |
| The Macromolecular Hypothesis | p. 19 |
| Historical Development of Industrial Polymers | p. 20 |
| Molecular Engineering | p. 21 |
| References | p. 22 |
| General Reading | p. 22 |
| Handbooks, Encyclopedias, and Dictionaries | p. 24 |
| Web Sites | p. 24 |
| Study Problems | p. 25 |
| Names for Polymers | p. 26 |
| Chain Structure and Configuration | p. 29 |
| Examples of Configurations and Conformations | p. 30 |
| Theory and Instruments | p. 31 |
| Stereochemistry of Repeating Units | p. 36 |
| Repeating Unit Isomerism | p. 42 |
| Common Types of Copolymers | p. 45 |
| NMR in Modern Research | p. 47 |
| Multicomponent Polymers | p. 51 |
| Conformational States in Polymers | p. 55 |
| Analysis of Polymers during Mechanical Strain | p. 56 |
| Photophysics of Polymers | p. 58 |
| Configuration and Conformation | p. 63 |
| References | p. 63 |
| General Reading | p. 65 |
| Study Problems | p. 65 |
| Assorted Isomeric and Copolymer Macromolecules | p. 67 |
| Dilute Solution Thermodynamics, Molecular Weights, and Sizes | p. 71 |
| Introduction | p. 71 |
| The Solubility Parameter | p. 73 |
| Thermodynamics of Mixing | p. 79 |
| Molecular Weight Averages | p. 85 |
| Determination of the Number-Average Molecular Weight | p. 87 |
| Weight-Average Molecular Weights and Radii of Gyration | p. 91 |

| | |
|--|--------|
| Molecular Weights of Polymers | p. 103 |
| Intrinsic Viscosity | p. 110 |
| Gel Permeation Chromatography | p. 117 |
| Mass Spectrometry | p. 130 |
| Instrumentation for Molecular Weight Determination | p. 134 |
| Solution Thermodynamics and Molecular Weights | p. 135 |
| References | p. 136 |
| General Reading | p. 139 |
| Study Problems | p. 140 |
| Calibration and Application of Light-Scattering Instrumentation for the Case Where $P(\theta) \propto 1$ | p. 142 |
| Concentrated Solutions, Phase Separation Behavior, and Diffusion | p. 145 |
| Phase Separation and Fractionation | p. 145 |
| Regions of the Polymer-Solvent Phase Diagram | p. 150 |
| Polymer-Polymer Phase Separation | p. 153 |
| Diffusion and Permeability in Polymers | p. 172 |
| Latexes and Suspensions | p. 184 |
| Multicomponent and Multiphase Materials | p. 186 |
| References | p. 186 |
| General Reading | p. 190 |
| Study Problems | p. 190 |
| Scaling Law Theories and Applications | p. 192 |
| The Amorphous State | p. 197 |
| The Amorphous Polymer State | p. 198 |
| Experimental Evidence Regarding Amorphous Polymers | p. 199 |
| Conformation of the Polymer Chain | p. 211 |
| Macromolecular Dynamics | p. 217 |
| Concluding Remarks | p. 227 |
| References | p. 227 |
| General Reading | p. 230 |
| Study Problems | p. 230 |
| History of the Random Coil Model for Polymer Chains | p. 232 |
| Calculations Using the Diffusion Coefficient | p. 236 |
| Nobel Prize Winners in Polymer Science and Engineering | p. 237 |
| The Crystalline State | p. 239 |
| General Considerations | p. 239 |
| Methods of Determining Crystal Structure | p. 245 |
| The Unit Cell of Crystalline Polymers | p. 248 |
| Structure of Crystalline Polymers | p. 256 |
| Crystallization from the Melt | p. 260 |
| Kinetics of Crystallization | p. 271 |
| The Reentry Problem in Lamellae | p. 290 |

| | |
|--|--------|
| Thermodynamics of Fusion | p. 299 |
| Effect of Chemical Structure on the Melting Temperature | p. 305 |
| Fiber Formation and Structure | p. 307 |
| The Hierarchical Structure of Polymeric Materials | p. 311 |
| How Do You Know It's a Polymer? | p. 312 |
| References | p. 314 |
| General Reading | p. 320 |
| Study Problems | p. 320 |
| Polymers in the Liquid Crystalline State | p. 325 |
| Definition of a Liquid Crystal | p. 325 |
| Rod-Shaped Chemical Structures | p. 326 |
| Liquid Crystalline Mesophases | p. 326 |
| Liquid Crystal Classification | p. 331 |
| Thermodynamics and Phase Diagrams | p. 338 |
| Mesophase Identification in Thermotropic Polymers | p. 341 |
| Fiber Formation | p. 342 |
| Comparison of Major Polymer Types | p. 344 |
| Basic Requirements for Liquid Crystal Formation | p. 345 |
| References | p. 346 |
| General Reading | p. 347 |
| Study Problems | p. 348 |
| Glass-Rubber Transition Behavior | p. 349 |
| Simple Mechanical Relationships | p. 350 |
| Five Regions of Viscoelastic Behavior | p. 355 |
| Methods of Measuring Transitions in Polymers | p. 366 |
| Other Transitions and Relaxations | p. 375 |
| Time and Frequency Effects on Relaxation Processes | p. 377 |
| Theories of the Glass Transition | p. 381 |
| Effect of Molecular Weight on T_g | p. 397 |
| Effect of Copolymerization on T_g | p. 399 |
| Effect of Crystallinity on T_g | p. 404 |
| Dependence of T_g on Chemical Structure | p. 408 |
| Effect of Pressure on T_g | p. 410 |
| Damping and Dynamic Mechanical Behavior | p. 412 |
| Definitions of Elastomers, Plastics, Adhesives, and Fibers | p. 415 |
| References | p. 415 |
| General Reading | p. 420 |
| Study Problems | p. 420 |
| Molecular Motion near the Glass Transition | p. 423 |
| Cross-linked Polymers and Rubber Elasticity | p. 427 |
| Cross-links and Networks | p. 427 |

| | |
|--|--------|
| Historical Development of Rubber | p. 430 |
| Rubber Network Structure | p. 432 |
| Rubber Elasticity Concepts | p. 434 |
| Thermodynamic Equation of State | p. 437 |
| Equation of State for Gases | p. 439 |
| Statistical Thermodynamics of Rubber Elasticity | p. 442 |
| The "Carnot Cycle" for Elastomers | p. 450 |
| Continuum Theories of Rubber Elasticity | p. 453 |
| Some Refinements to Rubber Elasticity | p. 459 |
| Internal Energy Effects | p. 469 |
| The Flory-Rehner Equation | p. 472 |
| Gelation Phenomena in Polymers | p. 473 |
| Gels and Gelation | p. 478 |
| Effects of Strain on the Melting Temperature | p. 479 |
| Elastomers in Current Use | p. 480 |
| Summary of Rubber Elasticity Behavior | p. 488 |
| References | p. 489 |
| General Reading | p. 494 |
| Study Problems | p. 495 |
| Gelatin as a Physically Cross-linked Elastomer | p. 497 |
| Elastic Behavior of a Rubber Band | p. 501 |
| Determination of the Cross-link Density of Rubber by Swelling to Equilibrium | p. 503 |
| Polymer Viscoelasticity and Rheology | p. 507 |
| Stress Relaxation and Creep | p. 507 |
| Relaxation and Retardation Times | p. 515 |
| The Time-Temperature Superposition Principle | p. 529 |
| Polymer Melt Viscosity | p. 533 |
| Polymer Rheology | p. 538 |
| Overview of Viscoelasticity and Rheology | p. 547 |
| References | p. 548 |
| General Reading | p. 550 |
| Study Problems | p. 550 |
| Energy of Activation from Chemical Stress Relaxation Times | p. 552 |
| Viscoelasticity of Cheese | p. 553 |
| Mechanical Behavior of Polymers | p. 557 |
| An Energy Balance for Deformation and Fracture | p. 557 |
| Deformation and Fracture in Polymers | p. 560 |
| Crack Growth | p. 585 |
| Cyclic Deformations | p. 588 |
| Molecular Aspects of Fracture and Healing in Polymers | p. 593 |
| Friction and Wear in Polymers | p. 601 |

| | |
|---|--------|
| Mechanical Behavior of Biomedical Polymers | p. 603 |
| Summary | p. 606 |
| References | p. 607 |
| General Reading | p. 610 |
| Study Problems | p. 611 |
| Polymer Surfaces and Interfaces | p. 613 |
| Polymer Surfaces | p. 614 |
| Thermodynamics of Surfaces and Interfaces | p. 615 |
| Instrumental Methods of Characterization | p. 619 |
| Conformation of Polymer Chains in a Polymer Blend Interphase | p. 644 |
| The Dilute Solution-Solid Interface | p. 646 |
| Instrumental Methods for Analyzing Polymer Solution Interfaces | p. 652 |
| Theoretical Aspects of the Organization of Chains at Walls | p. 659 |
| Adhesion at Interfaces | p. 667 |
| Interfaces of Polymeric Biomaterials with Living Organisms | p. 675 |
| Overview of Polymer Surface and Interface Science | p. 677 |
| References | p. 679 |
| General Reading | p. 683 |
| Study Problems | p. 684 |
| Estimation of Fractal Dimensions | p. 686 |
| Multicomponent Polymeric Materials | p. 687 |
| Classification Schemes for Multicomponent Polymeric Materials | p. 688 |
| Miscible and Immiscible Polymer Pairs | p. 692 |
| The Glass Transition Behavior of Multicomponent Polymer Materials | p. 693 |
| The Modulus of Multicomponent Polymeric Materials | p. 698 |
| The Morphology of Multiphase Polymeric Materials | p. 706 |
| Phase Diagrams in Polymer Blends (Broad Definition) | p. 710 |
| Morphology of Composite Materials | p. 721 |
| Nanotechnology-Based Materials | p. 723 |
| Montmorillonite Clays | p. 728 |
| Fracture Behavior of Multiphase Polymeric Materials | p. 736 |
| Processing and Applications of Polymer Blends and Composites | p. 741 |
| References | p. 748 |
| General Reading | p. 753 |
| Study Problems | p. 754 |
| Modern Polymer Topics | p. 757 |
| Polyolefins | p. 757 |
| Thermoset Polymer Materials | p. 762 |
| Polymer and Polymer Blend Aspects of Bread Doughs | p. 765 |
| Natural Product Polymers | p. 769 |
| Dendritic Polymers and Other Novel Polymeric Structures | p. 773 |

| | |
|---|--------|
| Polymers in Supercritical Fluids | p. 779 |
| Electrical Behavior of Polymers | p. 782 |
| Polymers for Nonlinear Optics | p. 786 |
| Light-Emitting Polymers and Electroactive Materials | p. 789 |
| Optical Tweezers in Biopolymer Research | p. 794 |
| The 3-D Structure and Function of Biopolymers | p. 795 |
| Fire Retardancy in Polymers | p. 807 |
| Polymer Solution-Induced Drag Reduction | p. 811 |
| Modern Engineering Plastics | p. 814 |
| Major Advances in Polymer Science and Engineering | p. 815 |
| References | p. 817 |
| General Reading | p. 822 |
| Study Problems | p. 823 |
| Index | p. 827 |
