

Introduction  
Description of Crystals  
Atom Packing in fcc and hcp Crystals  
The Stereographic Projection  
Structure Determination  
X-ray Diffraction  
Transmission Electron Microscope (TEM)  
Scanning Electron Microscope (SEM)  
The Plastic Deformation of Metal Crystals  
Slip Systems  
Resolved Shear Stress (Schmidt Factor)  
Single-Crystal Tensile Tests (fcc)  
Relationship to Polycrystalline Deformation  
Theoretical Strength of Metals  
Dislocations  
The Edge Dislocation  
The Screw Dislocation  
Mixed Dislocations  
Terminology of "Crooked" Dislocations  
Dislocation Loops  
Mobile Dislocations in Real Crystals  
Observation of Dislocations  
Elastic Strain Energy  
Energy of Dislocations  
Forces upon Dislocations  
The Stress Field Produced by Dislocations  
Line Tension  
Extended Dislocations  
Dislocations in fcc Metals  
Frank-Read Generator  
Interpretation of Plastic Flow in Terms of Dislocation Motion  
Vacancies  
Vacancy Formation  
Diffusion  
Phenomenological Approach  
Atomistic Approach  
Interfaces  
Classification, Geometry, and Energy of Interfaces  
Surface Tension and Surface Free Energy of Interfaces  
The Shape of Grains in Two and Three Dimensions  
Grain-Boundary Segregation

Motion of Grain Boundaries  
Nucleation  
Homogeneous Nucleation  
Heterogeneous Nucleation  
Solidification  
Nucleation  
Solidification of Pure Metals  
Solidification of Alloys  
Solidification of Eutectic Alloys  
Cast Metals  
Recovery and Recrystallization  
Stored Energy  
Release of Stored Energy during Annealing  
Kinetics of Recovery  
Nucleation Mechanisms for Recrystallization  
Kinetics of Recrystallization  
Control of Recrystallization Temperature and Grain Size  
Related Topics  
Precipitation from Solid Solutions  
Review of Free-Energy Composition Diagrams  
The Precipitation Transformation  
Nucleation in the Solid State  
Kinetics of Precipitation Reactions  
Precipitation Hardening  
Diffusion-Controlled Growth of Equilibrium Precipitates  
Single-Phase Precipitates  
Eutectoid Transformations  
Discontinuous Precipitation  
Martensitic Transformations  
Twinning  
Crystallography of Martensitic Transformations  
Some Characteristics of Martensitic Transformations  
Thermodynamics  
Thermoelastic Martensites  
Additional Characteristics of Martensitic Transformations  
Nucleation of Martensite  
Summary and Comparison with Massive Transformations  
Bainite  
Some Applications of Physical Metallurgy  
Strengthening Mechanisms  
Strength and Ductility

The Physical Metallurgy of Some High-Strength Steels?

S.I. Units
