Coherent Flow Structures in Smooth-wall Turbulent Boundary Layers: Facts, Mechanisms and Speculations
Generalized Scaling of Coherent Bursting Structures in the Near-wall Region of Turbulent Flow over Smooth and Rough Boundaries
Laboratory Observations of Particlr Entrainment into Suspension by Turbulent Bursting
Transverse Spacing of Low-speed Streaks in a Channel Flow over a Rough Bed
A Model of an Impinging Jet on a Granular Bed, with Application to Turbulent, Event-driven Bedload Transport
Ratio of Lift and Shear Forces Over Rough Surfaces
Scales of Turbulent Coherent Flow Structures in Gravel-bed Rivers
Markov Analysis of Velocity Fluctuations in Gravel-bed Rivers
The Application of Particle Image Velocimetry to the Study of Coherent Flow Structures over a Stabilizing Sediment Bed
Flow Sediment Interactions in Separating Flows over Befforms
The role of Coherent Structures in Developing Beforms During Sediment Transport
Geometrical Analysis of the Feedback Between Flow, Bedforms and Sediment Transport

Genesis Morphology of Erosional Shapes Associated with Turbulent Flow Over a Forward-facing Step
Coherent Flow Structures in Open-channel SLot Flow
Mean Flow and Turbulence Structure over Fixed Ripples and the Ripple-dube Transition

Turbulent Sand Suspension Events: Fraser River, Canada
Coherent Flow Structures in Squamish River Estuary, British Columbia, Canada
Observations of Near-bed Suspended Sediment Turbulence Structures using Multifrequency Acoustic Backscattering
Interaction Between Cellular Secondary Currents and Lateral Alternate Sorting
Coherent Fluctuations in a Vegetated Zone of Open-channel Flow: Causes of Bedload Lateral Transport and Sorting
The Structure of River Bed Relief
Some Speculations on the Relation Between Channel Morphology and Channel-scale Flow Structures
The Origin and Downstream Development of Coherent Flow Structures at Channel Junctions
Mean Structure of Transport-effective Flows at an Asymmetrical Confluence when the Main Stream is Dominant
Secondary Flow and Channel Changes around a Bar in the Brahmaputra River, Bangladesh

Morphology and Stage-dependent Flow Structure in a Gravel-bed River
A Computer Model of Bank Erosion Based on Secondary Flow Simularion
Floodplain Secondary Circulation as a Mechanism for Flow and Shear Stress Redistribution in Straight Compound Channels
Meandering Overbank Flow Structures
Flow Structure in a Large-scale Model of a Doubly Meandeering Compound River Channel

Linking Hydraulics, Bedload Transport and River Bed Adjustment with the Conceptual FAST Model

On the Origin and Effects of Large-scale Longitudinal Flow Structures in the Outer Humber Estuary

Incoherent Structure: Turbulence as a Metaphor for Stream Braiding
