

Transport of Metals Across Membranes

Interactions between Trace Metals and Aquatic Organisms: A Critique of the Free-Ion Activity Model

Environmental Organometallic Chemistry of Mercury, Tin and Lead: Present Status and Perspectives

Problems in Trace Metal Speciation Modeling

Trace Metal Speciation of Labile Chemical Species in Natural Water: Electrochemical Methods

Trace Metal Speciation of Labile Chemical Species in Natural Waters and Sediments: Non-Electrochemical Approaches

Chromatographic Approaches to Trace Element Speciation of Non-Labile Chemical Species

The Trophic Transfer of Metals in Marine Systems

Biological Factors Involved in Metal Concentrations Observed in Aquatic Organisms

Metal Detoxification in Aquatic Organisms

Prediction of Metal Toxicity in Nature from Bioassays: Limitations and Research Needs
