The history of panel data econometrics, 1861-1997
Pooling cross-section and time-series data in the estimation of a dynamic model: the demand for natural gas (with Pietro Balestra)
Experimental evidence on the estimation of dynamic economic relations from a time-series of cross-sections
Further evidence on the estimation of dynamic economic relations from a time-series of cross-sections
A note on error-components models
Growth rate convergence, fact or artifact? An essay on panel data econometrics
Properties of alternative estimators of dynamic panel models: an empirical analysis of cross-country data for the study of economic growth
Likelihood inference for dynamic panel models
