

Preface to the first edition	p. ix
Preface to the second edition	p. xi
Basic notation and conventions	p. xii
Introduction	p. xv
Information measures in simple coding problems	p. 1
Source coding and hypothesis testing; information measures	p. 3
Types and typical sequences	p. 16
Formal properties of Shannon's information measures	p. 34
Non-block source coding	p. 48
Blowing up lemma: a combinatorial digression	p. 71
Two-terminal systems	p. 81
The noisy channel coding problem	p. 83
Rate-distortion trade-off in source coding and the source-channel transmission problem	p. 107
Computation of channel capacity and ϵ -distortion rates	p. 120
A covering lemma and the error exponent in source coding	p. 132
A packing lemma and the error exponent in channel coding	p. 144
The compound channel revisited: zero-error information theory and extremal combinatorics	p. 184
Arbitrarily varying channels	p. 209
Multi-terminal systems	p. 241
Separate coding of correlated sources	p. 243
Multiple-access channels	p. 272
Entropy and image size characterization	p. 304
Source and channel networks	p. 354
Information-theoretic security	p. 400
References	p. 461
Name index	p. 478
Index of symbols and abbreviations	p. 482
Subject index	p. 485
