

Around we go! -Transmitting rotary motion using belts, pulleys, sprockets and chains

Gnashing teeth! -An analysis of gear trains

Tipping, tilting and turning -The variable-based triangle

Swings, lifts and balances -Applications of the parallelogram linkage

From rocking horses to steam engines -Applications of the isosceles trapezium linkage

Why is a cyclist like a pedal bin? -Applications and analysis of the general 4-bar linkage

Hoist away! -Winding mechanisms

Rolling along -Rollers and wheels

Forward twist! -Combining rotary and linear motion

A bumpy ride! -Cams and ratchets

Win some, lose some! -Levers and hydraulic rams

Mechanical manipulators -An analysis of robot designs

Solutions to exercises
