Preface

Language Extensions Ada++
A class and inheritance extension for Ada
Dynamic binding and inheritance in an object-oriented Ada design
Language extensions to allow rapid mode shifting in the Ada programming language

Real Time Design Dragoon
An Ada-based object oriented language for concurrent, real-time, distributed systems
A practical real-time design method for Ada
Practical experiences of Ada and OOD in real-time distributed systems
A portable common execution environment for Ada
PROMETHEE: designing a process control system
Ada tools for rapid prototyping of real-time systems
Real-Time Scheduling
Hard real time systems and Ada
Comprehensive race controls: a versatile scheduling mechanism for real-time applications
A review of analytic real-time scheduling theory and its application to Ada

Design Language Adadl and Aisle
An Ada-based PDL and supporting toolset which encourage the use of Ada during design

Formalising the design of Ada systems using LOTOS D. W. Bustard
From algebraic specifications to correct Ada programs: the Esprit Project PROSPECTRA

Implementation Issues
Design for high performance
A storage model for Ada on hierarchical-memory multiprocessor
Practical Experience
Designing a flight control program with Ada
The use of JSD and Ada on the submarine command system project
Cordada: an expert system compiler into Ada
Observations on portable Ada systems
Synthesizing software development using Ada
Ada mechanisms to obtain concurrency in GKS
