Structural parallel algorithmics
PRAM models and fundamental parallel algorithmic techniques: part I
PRAM models and fundamental parallel algorithmic techniques: part II
Efficient parallel graph algorithms
Some parallel geometric algorithms
Parallel algorithms for string pattern matching
Design of parallel matrix algorithms
Dependable parallel computing on unreliable parallel machines
P-completeness
Introduction to distributed memory models of parallel computation
Network orientation
Special purpose parallel computing
General purpose parallel computing
Complexity models for all-purpose parallel computation
Implementing sparse BLAS primitives on concurrent/vector processors
