Introduction
Chondrules and the protoplanetary disk: An overview
Chondrules, Ca-Al-Rich Inclusions and Protoplanetary Disks
Astronomical observations of phenomena in protostellar disks
Overview of models of the solar nebula: potential chondrule-forming environments
Large scale processes in the solar nebula
Turbulence, chondrules and planetesimals
Chondrule formation: energetics and length scales
Unresolved issues in the formation of chondrules and chondrites
Thermal processing in the solar nebula: constraints from refractory inclusions
Formation times of chondrules and Ca-Al-Rich inclusions: constraints from short-lived radionuclides
Formation of chondrules and chondrites in the protoplanetary nebula
Chondrule precursors and multiple melting
Origin of refractory precursor components of chondrules
Mass-independent isotopic effects in chondrites: the role of chemical processes
Agglomeratic chondrules: implications for the nature of chondrule precursors and formation by incomplete melting
Constraints on chondrule precursors from experimental Data
Nature of matrix in unequilibrated chondrites and its possible relationship to chondrules
Constraints on chondrite agglomeration from fine-grained chondrule Rims
Relict grains in chondrules: evidence for chondrule recycling
Multiple heating of chondrules
Microchondrule-bearing chondrule rims: constraints on chondrule formation
Heating, Cooling and Volatiles
A dynamic crystallization model for chondrule melts
Peak temperatures of flash-melted chondrules
Congruent melting kinetics: constraints on chondrule formation
Sodium and sulfur in chondrules: heating time and cooling curves
Open-system behaviour during chondrule formation
Recycling and volatile loss in chondrule formation
Chemical fractionations of chondrites: signatures of events before chondrule formation
Models of Chondrule Formation
A concise guide to chondrule formation models
Models for multiple heating mechanisms
Chondrule formation in the accretional shock
The protostellar jet model of chondrule formation
Chondrule formation in lightning discharges: status of theory and experiments
Chondrules and their associates in ordinary chondrites: a planetary connection?
Collision of icy and slightly differentiated bodies as an origin for unequilibrated ordinary chondrites
A chondrule-forming scenario involving molten planetisimals
