

Preface

Trends in microelectronics and optoelectronics

Theoretical basis of nanoelectronics

Electrons in quantum structures

Properties of particular quantum structures

Lattice vibrations in quantum structures

Electron scattering in quantum structures

Parallel transport in quantum structures

Perpendicular transport in quantum structures

Electronic devices based on quantum heterostructures

Optics of quantum structures

Electro-optics and nonlinear optics

Optical devices based on quantum structures

Table of Contents provided by Blackwell's Book Services and R.R. Bowker. Used with permission.
