

Understanding Earth: An Introduction to Physical Geology	p. 2
Prologue	p. 3
Introduction to Earth Systems	p. 4
What Is Geology?	p. 5
How Does Geology Relate to the Human Experience?	p. 9
How Does Geology Affect Our Everyday Lives?	p. 10
Global Geologic and Environmental Issues Facing Humankind	p. 11
The Origin of the Solar System and the Differentiation of Early Earth	p. 12
Why Is Earth a Dynamic Planet?	p. 14
Geology and the Formulation of Theories	p. 15
Plate Tectonic Theory	p. 15
The Rock Cycle	p. 17
Geologic Time and Uniformitarianism	p. 20
How Does the Study of Geology Benefit Us?	p. 21
Plate Tectonics: A Unifying Theory	p. 26
Prologue	p. 27
Introduction	p. 28
Why Should You Study Plate Tectonics?	p. 29
What Were Some Early Ideas About Continental Drift?	p. 29
What Is the Evidence for Continental Drift?	p. 30
How Do Magnetic Reversals Relate to Seafloor Spreading?	p. 35
Plate Tectonic Theory	p. 39
What Are the Three Types of Plate Boundaries?	p. 41
How Are Plate Movement and Motion Determined?	p. 47
What Is the Driving Mechanism of Plate Tectonics?	p. 48
How Does Plate Tectonics Affect the Distribution of Natural Resources?	p. 49
Minerals: The Building Blocks of Rocks	p. 54
Prologue	p. 55
Introduction	p. 57
Why Should You Study Minerals?	p. 57
Matter--What Is It and What Does It Consist of?	p. 57
What Are Minerals?	p. 61
How Many Minerals Are Known?	p. 62
Mineral Groups Recognized by Geologists	p. 63
How Are Minerals Identified?	p. 68
Where and How Do Minerals Originate?	p. 70
What Are Rock-Forming Minerals?	p. 71
Mineral Resources and Reserves	p. 71
Igneous Rocks and Intrusive Igneous Activity	p. 78
Prologue	p. 79
Introduction	p. 80

Why Should You Study Igneous Rocks and Intrusive Igneous Activity?	p. 81
The Properties and Behavior of Magma and Lava	p. 81
How Does Magma Originate and Change?	p. 83
Igneous Rocks--What Are Their Characteristics?	p. 87
Intrusive Igneous Bodies: Plutons--Characteristics and Origins	p. 92
How Are Batholiths Emplaced in Earth's Crust?	p. 94
Volcanism and Volcanoes	p. 102
Prologue	p. 103
Introduction	p. 105
Why Should You Study Volcanism and Volcanoes?	p. 105
Volcanism	p. 106
What Are Volcanoes?	p. 110
Do All Eruptions Build Up Volcanoes?	p. 118
How Large Is an Eruption and How Long Do Eruptions Last?	p. 120
Is It Possible to Predict Eruptions?	p. 121
Distribution of Volcanoes	p. 122
Plate Tectonics, Volcanoes, and Plutons	p. 123
Weathering, Erosion, and Soil	p. 130
Prologue	p. 131
Introduction	p. 133
Why Should You Study Weathering, Erosion, and Soil?	p. 133
Mechanical Weathering	p. 133
Chemical Weathering--Decomposition of Earth Materials	p. 135
How Fast Does Chemical Weathering Take Place?	p. 140
What Is Soil, and How Does It Form?	p. 142
The Soil Profile	p. 142
What Factors Are Important in Soil Formation?	p. 143
Soil Degradation	p. 145
Weathering and Natural Resources	p. 147
Sediment and Sedimentary Rocks	p. 152
Prologue	p. 153
Introduction--What Is Sediment and How Does It Originate?	p. 155
Why Should You Study Sediment and Sedimentary Rocks?	p. 155
Sediment Transport and Deposition	p. 156
How Is Sediment Transformed into Sedimentary Rock?	p. 157
What Kinds of Sedimentary Rocks Do Geologists Recognize?	p. 159
Sedimentary Facies	p. 162
Reading the Story in Sedimentary Rocks	p. 163
Resources in Sediments and Sedimentary Rocks	p. 169
Metamorphism and Metamorphic Rocks	p. 176
Prologue	p. 177

Introduction	p. 179
Why Should You Study Metamorphic Rocks?	p. 179
What Are the Agents of Metamorphism?	p. 180
What Are the Three Types of Metamorphism?	p. 181
How Are Metamorphic Rocks Classified?	p. 187
What Are Metamorphic Zones?	p. 191
How Does Metamorphism Relate to Plate Tectonics?	p. 192
Metamorphism and Natural Resources	p. 192
Earthquakes and Earth's Interior	p. 198
Prologue	p. 199
Introduction	p. 200
Why Should You Study Earthquakes?	p. 202
What Is the Elastic Rebound Theory?	p. 202
What Is Seismology?	p. 203
Where Do Earthquakes Occur, and How Often?	p. 204
What Are Seismic Waves?	p. 205
How Is an Earthquake's Epicenter Located?	p. 208
How Is the Size and Strength of an Earthquake Measured?	p. 209
What Are the Destructive Effects of Earthquakes?	p. 211
Can Earthquakes Be Predicted?	p. 216
Can Earthquakes Be Controlled?	p. 219
What Is Earth's Interior Like?	p. 220
Earth's Internal Heat	p. 226
Deformation and Mountain Building	p. 232
Prologue	p. 233
Introduction	p. 234
Why Should You Study Deformation and Mountain Building?	p. 235
How Does Rock Reform?	p. 236
Strike and Dip--Determining the Orientation of Rock Layers	p. 237
Deformation and Geologic Structures	p. 237
Deformation and the Origin of Mountains	p. 247
How Does Plate Tectonics Account for the Origin of Mountains?	p. 250
Earth's Continental Crust	p. 256
Mass Wasting	p. 262
Prologue	p. 263
Introduction	p. 264
Why Should You Study Mass Wasting?	p. 264
What Factors Influence Mass Wasting?	p. 264
What Are the Different Types of Mass Wasting?	p. 271
How Can We Recognize and Minimize the Effects of Mass Movements?	p. 280
Running Water	p. 286

Prologue	p. 287
Introduction	p. 289
Why Should You Study Running Water?	p. 289
The Hydrologic Cycle	p. 289
Running Water	p. 293
How Does Running Water Erode and Transport Sediment?	p. 295
Deposition by Running Water	p. 295
Drainage Basins and Drainage Patterns	p. 302
The Significance of Base Level	p. 306
What Is a Graded Stream?	p. 307
How Do Valleys Form and Evolve?	p. 308
Groundwater	p. 316
Prologue	p. 317
Introduction	p. 319
Why Should You Study Groundwater?	p. 319
Groundwater and the Hydrologic Cycle	p. 319
How Do Earth Materials Absorb Water?	p. 319
What Is the Water Table?	p. 320
How Does Groundwater Move?	p. 321
What Are Springs, Water Wells, and Artesian Systems?	p. 322
How Does Groundwater Erode and Deposit Material?	p. 325
How Do Humans Impact the Groundwater System?	p. 329
Hydrothermal Activity--What Is It, and Where Does It Occur?	p. 336
Glaciers and Glaciation	p. 344
Prologue	p. 345
Introduction	p. 346
Why Should You Study Glaciers and Glaciation?	p. 347
Glaciers--Part of the Hydrologic Cycle	p. 347
How Do Glaciers Form and Move?	p. 348
What Kinds of Glacier Are There?	p. 349
Accumulation and Wastage--The Glacial Budget	p. 350
How Fast Do Glaciers Move?	p. 350
Erosion and Transport by Glaciers	p. 351
Glacial Deposits	p. 360
What Causes Ice Ages?	p. 366
The Work of Wind and Deserts	p. 372
Prologue	p. 373
Introduction	p. 375
Why Should You Study Deserts?	p. 375
How Does Wind Transport Sediment?	p. 375
How Does Wind Erode Landforms?	p. 376

What Are the Different Types of Wind Deposits?	p. 378
How Are Air-Pressure Belts and Global Wind Patterns Distributed?	p. 382
Where Do Deserts Occur?	p. 383
What Are the Characteristics of Deserts?	p. 384
What Types of Landforms Are Found in Deserts?	p. 386
The Seafloor, Shorelines, and Shoreline Processes	p. 396
Prologue	p. 397
Introduction	p. 399
Why Should You Study the Seafloor, Shorelines, and Shoreline Processes?	p. 399
Exploration of the Oceans	p. 399
What Features Are Found on the Seafloor?	p. 399
Deep-Sea Sediments and Reefs	p. 404
Shorelines and Shoreline Processes	p. 406
Deposition Along Shorelines	p. 412
The Nearshore Sediment Budget	p. 416
How Are Shorelines Eroded?	p. 417
Types of Coasts	p. 419
Resources from the Sea	p. 421
Geologic Time: Concepts and Principles	p. 426
Prologue	p. 427
Introduction	p. 428
Why Should You Study Geologic Time?	p. 429
How Has the Concept of Geologic Time and Earth's Age Changed Throughout Human History?	p. 429
Why Are James Hutton's Contributions to Geology Important?	p. 431
What Are Relative-Dating Methods?	p. 431
How Do Geologists Correlate Rock Units?	p. 438
What Are Absolute-Dating Methods?	p. 439
How Was the Geologic Time Scale Developed?	p. 446
Earth History	p. 452
Prologue	p. 453
Introduction	p. 454
Why Should You Study Earth's Geologic History?	p. 454
Precambrian Earth History	p. 455
What Was the Paleozoic Geography of Earth?	p. 458
Paleozoic Evolution of North America	p. 463
The History of Paleozoic Mobile Belts	p. 470
What Role Did Microplates Play in Forming Pangaea?	p. 472
The Breakup of Pangaea	p. 472
The Mesozoic History of North America	p. 472
Cenozoic Earth History	p. 480
Mineral Resources	p. 485

Life History	p. 492
Prologue	p. 493
Introduction	p. 494
Why Should You Study the History of Life?	p. 495
Precambrian Life History	p. 495
Paleozoic Life	p. 497
Mesozoic Life	p. 502
Cenozoic Life History	p. 514
English--Metric Conversion Chart	p. 1
Periodic Table of the Elements	p. 2
Mineral Identification Tables	p. 4
Topographic Maps	p. 8
Answers: Multiple-Choice Review Questions	p. 12
Glossary	p. 1
Credits	p. 1
Index	p. 1
