Introduction to Creative Cognition
Overview
The Goals of Creative Cognition
Identifying Creative Cognitive Processes
Establishing General Principles
Anticipating Creative Discoveries
Developing Practical Techniques
Demystification of Creativity
Avoiding Circularity in Defining Creativity
Avoiding Minimization of the Concept
Previous Approaches to Creativity
Case Studies
Psychoanalytic Approaches
Psychometric Approaches
Sociological and Histriometric Approaches
Multiple Components Approaches
Pragmatic Approaches
Artificial Intelligence Approaches
Scope of Creative Cognition
Creative Visualization
Creative Invention
Conceptual Synthesis
Structured Imagination
Fixation, Incubation, and Insight
Creative Strategies for Problem Solving
General Applications of Creative Cognition
Theoretical and Methodological Considerations
A General Model
Overall Structure of the Geneplore Model
Generative Processes
Preinventive Structures
Preinventive Properties
Exploratory Processes
Product Constraints
Function Follows Form
Creativity and Randomness
Everyday Creativity and Creative Genius
Structuring Creative Opportunities
Predicting Creative Performance
Avoiding Demand Characteristics
Constraining Creative Opportunities
Controls for Guessing and Experimenter Bias
Introspective Reports
Creative Synthesis versus Creative Interpretation
Externalizing the Creative Process
Comparing Mental and Physical Synthesis
Strategies for Creative Construction
Summary
Theoretical Implications
Practical Implications
Creative Invention
A Paradigm for Invention
Creative Mental Synthesis of Real-World Objects
Restricting Object Parts and Categories
Examples of Creative Inventions
Restricting Object Types and Functions
Introspective Reports
Preinventive Forms
Further Support for the GenePlore Model
Examples of Creative Inventions Based on Preinventive Forms
Importance of Generating One's Own Forms
Removing Time Restrictions
Spanning the Object Categories Using a Single Preinventive Form
General Strategies for Interpreting Preinventive Forms
From Preinventive Form to Final Product
Creative Refinement
Creative Modifications of Existing Designs
Examples of Creative Refinements
Summary
Theoretical Implications
Practical Implications
Conceptual Synthesis
Creative Concepts
Conceptual Interpretations of Preinventive Forms
Examples of Creative Concepts
Restricting Subject Categories
Suspension of Expertise in Forming Creative Concepts
Conceptual Combination
Emergent Properties and Creative Exploration
Varieties of Conceptual Combination
The Attribute Inheritance Model
The Selective Modification Model
An Alternative Approach to Incubation
Fixation in Traditional Cognitive Tasks
Fixation in Creative Idea Generation
A Positive Use of Forgetting
Spreading Activation as a Mechanism for Incubation
Contextual Cues and the Use of Analogy
Spontaneous Analogical Transfer
Context-Dependent Memory
Contextual Cues and Analogical Transfer
Summary
Theoretical Implications
Practical Implications
Creative Strategies for Problem Solving
Creative Reasoning and Exploration
Types of Problems
Well-Defined Versus Ill-Defined Problems
Insight Problems
General Problem-Solving Strategies
Algorithms and Heuristics
Induction
Using Mental Images
Exploring Mental Models
Analogical Reasoning
Mental Blocks
Metacognition and Problem Solving
Intuition
Protocol Analysis
Divergent Thinking
Finding Alternative Uses
Remote Association
Brainstorming
Creative Expertise
Summary
Theoretical Implications
Practical Implications
General Implications and Applications
Summary of Theoretical Implications
Implications of the Geneplore Model
Ecological Validity of Creative Cognition
Creative Artificial Intelligence
Components of Creative Cognition
