Contributors
Preface
Perspectives on Development: Introduction
Critique of the Modern Ethologists Attitude
The Problem of Change
The Epigenetic System and the Development of Cognitive Functions
From Gene to Organism: The Developing Individual as an Emergent, Interactional, Hierarchical System
Brain Maturation: Introduction
General Principles of CNS Development
Intrinsic and Extrinsic Determinants of Neocortical Parcellation: a Radical Unit Model
Positron Emission Tomography Study of Human Brain Functional Development
Morphometric Study of Human Cerebral Cortex Development
Brain Maturation and Cognition: Introduction
The Development of Visual Attention: A Cognitive Neuroscience Perspective
The Ontogeny of Human Memory: A Cognitive Neuroscience Perspective
Brain Plasticity: Introduction
Experience and Brain Development
Do Cortical Areas Emerge from a Protocortex?
Emergence of Order in Visual System Development
Specificity and plasticity in Neurocognitive Development in Humans
Linguistic, Cognitive, and Affective Development in Children with Pre- and Perinatal Focal Brain Injury: A Ten-Year Overview from the San Diego Longitudinal Project
Cortical Plasticity Underlying Perceptual, Motor, and Cognitive Skill Development: Implications for Neurorehabilitation
The Instinct to Learn
Self Organization and Development: Introduction
Self-Organization in Developmental Processes: Can system Approaches Work?
Development Itself is the Key to Understanding Developmental Disorders
Object Recognition and Sensitive Periods: A Computational Analysis of Visual Imprinting
New Directions: Introduction
Connectionism and the Study of Change
A Model System for Studying the Role of Dopamine in Prefrontal Cortex During Early Development in Humans: Early and Continuously Treated Phenylketonuria (PKU)
Genes and Brain: Individual Differences and Human Universals
