Preface
Acknowledgements
Inductivism and its Critics
Some Historical Background: Inductivism, Russell and the Cambridge School, the Vienna Circle and Popper
Inductivism
The Uniformity of Nature and the Principle of Induction
Russell and the Cambridge School
The Vienna Circle
The Twentieth-Century Revolution in Physics
Popper
The Dispersal of the Vienna Circle
Popper's Critique of Inductivism. His Theory of Conjectures and Refutations (or Falsificationism)
Popper's Critique of Inductivism
Popper's Theory of Conjectures and Refutations (or Falsificationism)
The Distinction between Discovery and Justification
Some General Observations on Popper's Theory of Scientific Method
Kepler's Discovery of the Elliptic Orbits of the Planets
Fleming's Discovery of Penicillin: Creative Induction
The Discovery of the Sulphonamide Drugs: Mechanical or Baconian Induction
Duhem's Critique of Inductivism
Inductivism as the Newtonian Method
Newton's Inference of the Law of Gravity from Kepler's Laws and Duhem's Objections
Criticisms of Inductivism and the Revolution in Physics
The Lives of Duhem and Poincare
Artificial Intelligence and the Revival of Inductivism
Conventionalism and the Duhem-Quine Thesis
Poincare's Conventionalism of 1902
Kant's Philosophy of Geometry
The Discovery of Non-Euclidean Geometry
Poincare's Conventionalist Philosophy of Geometry
Poincare's Conventionalism and Newtonian Mechanics
Poincare on the Limits of Conventionalism
The Duhem Thesis and the Quine Thesis
Preliminary Exposition of the Thesis. The Impossibility of a Crucial Experiment
Duhem's Criticisms of Conventionalism. His Theory of Good Sense (le bon sens)
The Quine Thesis
The Duhem-Quine Thesis
The Nature of Observation
Protocol Sentences
Carnap's Views on Observation Statements in the Early 1930s
Neurath's Views on Observation Statements in the Early 1930s
Popper's Views on Basic Statements in 1934
Is Observation Theory-Laden?
Duhem's View that All Observation in Physics is Theory-Laden
A Reinforcement of the Holistic Thesis and Neurath's Principle
Some Psychological Findings
Some General Conclusions
The Demarcation between Science and Metaphysics
Is Metaphysics Meaningless? Wittgenstein, the Vienna Circle, and Popper's Critique

Introduction: The Demarcation Problem and its Importance
Wittgenstein's Life
Wittgenstein's Tractatus
The Vienna Circle on Metaphysics
Popper's Critique of the Vienna Circle on Metaphysics
Wittgenstein's Later Theory of Meaning
The Influence of Wittgenstein's Life on his Philosophy
Metaphysics in Relation to Science: The Views of Popper, Duhem, and Quine
Popper on Metaphysics in Relation to Science
Duhem and Quine on the Status of Metaphysics
Duhem and Popper on the Influence of Metaphysics on Science
Duhem's Defence of Religion
Falsificationism in the Light of the Duhem-Quine Thesis
Falsificationism and the Falsifiability Criterion
Existential Statements
Probability Statements
Falsifiability and the Duhem-Quine Thesis
A Suggested Demarcation Criterion involving the Principle of Explanatory Surplus
How Much of Falsificationism can be Retained?
Some Concluding Philosophical Remarks
Notes
