**Disease Classification**

| Asthma: clinical descriptions and definitions | p. 3       |
| Rhinitis: the spectrum of the disease        |           |

**Epidemiology**

| Epidemiology of asthma                  | p. 17     |
| Epidemiology of rhinitis                | p. 33     |
| Epidemiology of occupational asthma     | p. 43     |
| Epidemiology of asthma mortality        | p. 56     |

**Genetics**

| Genetic approaches to studying asthma    | p. 73     |
| Antigen and transgenic modelling of asthma and airways hyperreactivity | p. 80 |
| The use of small animal models in the study of asthma                  | p. 97     |
| Genetics of atopy                                                            | p. 123    |
| Genetics of asthma and bronchial hyperresponsiveness                  | p. 134    |
| Genetic and molecular regulation of $[\beta_2]$-adrenergic receptors    | p. 144    |

**Anatomy, Development and Physiology**

| Nasal airways                           | p. 157    |
| Structural, immunological and neural elements of the normal human airway wall | p. 164 |

**Pathology**

| The pathology of fatal asthma            | p. 193    |
| The pathology of asthma of varying severity | p. 203   |
| Bronchoalveolar lavage in studies of asthma | p. 207  |
| Nasal polyposis: a model of chronic airways inflammation | p. 223 |
| Allergic and non-allergic rhinitis       | p. 232    |

**Mast Cells and Basophils**

| Development and maturation of mast cells and basophils | p. 245 |
| Mast cells and basophils: IgE and its receptors       | p. 260 |
| Human mast cells and basophils: heterogeneity and mediators | p. 275 |
| Mechanisms of mast cell activation                   | p. 296 |
| Mast cells in rhinitis                               | p. 311 |
| Mast cells in asthma                                 | p. 319 |
| Basophils in airways disease                         | p. 339 |

**Eosinophils**

| Human eosinophils--development, maturation and functional morphology | p. 351 |
| Mechanisms of eosinophil activation                    | p. 373 |
| Eosinophil mediators                                    | p. 394 |
The eosinophil and asthma p. 429
Eosinophils and rhinitis p. 480
Neutrophils and Platelets
Neutrophils and their mediators in asthma p. 503
Neutrophils and asthma p. 518
Platelets p. 531
Lymphocytes
Mucosa-associated lymphoid tissue of the lung: localization, numbers and dynamics of lymphoid cells in the five different compartments p. 543
Lymphocyte substances in allergic diseases p. 557
Cytokines in allergic airway disease p. 577
Regulation of immunoglobulin E synthesis p. 597
The lymphocyte in asthma p. 603
The lymphocyte in rhinitis p. 616
Functional heterogeneity of T-lymphocytes in the development of airway hyperresponsiveness p. 623
Macrophages, Monocytes and Dendritic Cells
Alveolar macrophages in asthma p. 637
Professional antigen-presenting cells p. 650
Antigen presentation in the asthmatic lung p. 671
Microvasculature
The role and contribution of adhesion molecules to asthma and pulmonary disease p. 691
Leukocyte-endothelial adhesion p. 702
Microvascular anatomy of the airways p. 721
In vivo processes of exudative airway inflammation with ultimate eosinophil activation and epithelial injury-repair p. 732
Vascular mechanisms in asthma p. 745
Epithelial Cells
Structure, composition and function of airway surface liquid p. 761
Mediator functions of epithelial cells p. 771
Regulation of epithelial-leukocyte interaction and epithelial immune-response genes p. 784
Epithelial cells: regulation of mucus secretion p. 801
Epithelial damage in asthma p. 817
Epithelial cell dysfunction in rhinitis p. 841
Neuroregulation
Neuroanatomy of the airways p. 857
Functional activity of lower airway nerves p. 866
Airway neuropeptides p. 891
Neural reflex pathways in rhinitis p. 909
Muscarinic receptors p. 914
Neural regulation of the immune response p. 927
Neuroregulation of mucosal vasculature p. 945
Mediators of Inflammation
Histamine and its receptors  p. 961
The roles of neutral proteases in asthma and rhinitis  p. 968
Prostanoids  p. 999
Leukotrienes  p. 1014
Adenosine: its contribution to our understanding of asthma  p. 1027
Chemokines and eosinophils  p. 1038
Kinins  p. 1047
Chemokines  p. 1063
Index

Role of Allergens in Airway Disease
Aerobiology  p. 1083
The molecular biology of allergens  p. 1107
House-dust mite proteinase allergens and their interaction with the bronchial epithelium  p. 1143
The role of house-dust mite and other allergens in asthma  p. 1157
The early and late asthmatic response to allergen  p. 1172
Primary allergic sensitization to inhalant allergens: adult responder phenotype is determined during early childhood  p. 1186
The role of environmental allergens in rhinitis  p. 1197
Pathophysiology
Animal models of asthma  p. 1205
Animal models of rhinitis  p. 1228
Airway mechanics in asthma  p. 1237
Airway hyperresponsiveness  p. 1248
Nasal hyperresponsiveness  p. 1261
Inflammatory mechanisms in airway hyperresponsiveness  p. 1273
Mechanisms of cough  p. 1282
Mechanisms of nocturnal asthma  p. 1303
Aspirin-sensitive asthma  p. 1315
Transcription factors in asthma  p. 1326
Interrelationship between asthma and chronic obstructive pulmonary disease  p. 1340
Intrinsic asthma  p. 1355
Smooth Muscle Response
The physiology of airway smooth muscle, and its dynamics in the bronchial wall during development and in maturity  p. 1381
The role of inflammation in the regulation of airway smooth muscle cell function and growth  p. 1402
Airway smooth muscle dysfunction in asthma  p. 1414
Epithelial control over smooth-muscle responsiveness  p. 1425
Exercise-Induced Asthma
Exercise-induced asthma: clinical manifestations  p. 1437
Dry-air and hyperosmolar challenge in asthma and rhinitis  p. 1449
Vascular mechanisms in exercise-induced asthma
Infectious Mechanisms in Asthma and Rhinitis
Common colds and respiratory viruses  p. 1481
Effects of viral infections on lower airway function  p. 1493
Otitis media and sinusitis  p. 1510
Mechanisms of Action of Drugs for the Treatment of Asthma and Rhinitis
Mechanisms of action of [beta subscript 2]-adrenoceptor agonists  p. 1541
Methylxanthines and phosphodiesterase inhibitors  p. 1558
Glucocorticoids in asthma and rhinitis  p. 1569
Glucocorticoid-insensitive bronchial asthma  p. 1582
Non-steroidal antiinflammatory drugs in asthma  p. 1591
Immunosuppressants  p. 1606
Antileukotrienes  p. 1620
Antihistamines in rhinitis and asthma  p. 1643
Antiallergic and vasoactive drugs for rhinitis  p. 1660
Activation of allergen-reactive T-lymphocytes and mechanisms of hyposensitization  p. 1669
Specific immunotherapy in allergic rhinitis and asthma  p. 1687
Antiallergic drugs  p. 1707
Drug delivery devices and propellants  p. 1719
Clinical Management of Asthma
Diagnosis in adults  p. 1735
Prevention of asthma  p. 1744
Treatment of chronic asthma  p. 1766
Education and training  p. 1776
The health economics of asthma  p. 1786
Outcome measures in asthma management  p. 1793
Asthma in Special Circumstances
Asthma and rhinitis during pregnancy  p. 1811
Asthma and surgery  p. 1827
Management of exercise-induced bronchoconstriction  p. 1839
Critical care management  p. 1848
Recalcitrant asthma  p. 1864
Anaphylaxis  p. 1880
Asthma in the elderly  p. 1890
Management of Asthma in Childhood
The wheezing infant and young child  p. 1899
Development of asthma through childhood  p. 1914
Asthma through childhood  p. 1925
Treatment of chronic asthma  p. 1935
The management of acute severe asthma in children  p. 1944
