Nutrition and Diet for a Healthy Lifestyle - Nutrition and diet for healthy lifestyles in Europe

Dietary advice in North America: The good, the bad and the unheeded

Chemistry, Structure and Rheology - Light microscopic investigations on dietary fibre

Assembly and rheology of non-starch polysaccharides

The structures and architectures of plant cell walls define dietary fibre composition and the textures of foods

Measurement of Dietary Fibre and Dietary Fibre Components - What is dietary fibre? - A new look at the definition

Development of dietary fibre methodology

Measurement of dietary fibre components: The importance of enzyme purity, activity and specificity

Vivo and vitro methods for resistant starch measurement

Regulatory Issues - Analytical issues regarding the regulatory aspects of dietary fiber nutrition labeling

Regulatory issues relating to dietary fibre in the European context

Health Benefits of Dietary Fibre - Dietary fibre in health and disease

Dietary fibre, carbohydrate metabolism and chronic disease

Dietary fibre and gastrointestinal function

Dietary fibres and dietary lipids

Food polysaccharides, glucose absorption and insulin sensitivity

Fermentation of oligosaccharides and influences of fermentation products

Cholesterol lowering properties of cereal fibres and fractions

Effects of psyllium on cholesterol levels

Non-digestible carbohydrates and gut function - Implications for carcinogenesis

Cereal fibre and heart disease

Technological Aspects - Developing fibre rich foods in the 21st century

Technological aspects of dietary fibre

Oatrim and nutrim X: Technological development and nutritional properties

Effects of processing on the properties of dietary fibre

Fibres and fibre blends for individual needs - A physiological and technological approach

Cereal Cell-Wall Polysaccharides - Cereal arabinoxylan: Occurrence, structure and properties

Cereal B-Glucans: Structure, properties and health claims

Legume-Seed Polysaccharides - Novel galactomannans and galacto-manno-oligosaccharides from Guar

Physiological and technological functions of partially hydrolysed Guar gum (modified galactomannans)

Dietary fibres of lupins and other grain legumes

Pectins - Pectins, their origin, structure and functions

Chemistry and enzymology of pectins

Resistant Starch - Resistant starch: Plant breeding, applications development and commercial use
Vivo and Vitro digestion of resistant starch
Resistant starch, health aspects and food uses
Structural features of resistant starch
Other Polysaccharides - Nutritional benefits of larch arabinogalactan
Oligosaccharides - Non-digestible oligosaccharides and polysaccharides: Their physiological effects and health implications
Development and beneficial effects of fructooligosaccharides (neosugar)
Fructooligosaccharides and other fructans: Chemistry, structure and nutritional effects
Galacto-oligosaccharides: Properties and health aspects
Polydextrose: Analysis and physiological benefits
Fibersol-2: A soluble, non digestible, starch-derived dietary fibre
