Technical and geo-political challenges facing onshore oil and gas pipelines and their influence on routing

Geohazards and pipeline engineering

Construction

Terrain and geohazard challenges facing onshore oil and gas pipelines: historic risks and modern responses

Lessons learned from fifty years of terrain evaluation in northern regions especially as applied to major pipelines

Terrain, ground conditions and geohazards: evaluation and implications for pipelines

Geohazards and risk assessment for pipeline route selection

Mapping of landslide hazard and risk along the pipeline route

A case study: geohazards risk assessment for a proposed pipeline across diverse geological environments in Papua New Guinea

In Salah Gas project, Algeria - part 1: terrain evaluation for desert pipeline routing

In Salah Gas project, Algeria - part 2: detailed terrain evaluation for site design

A framework for assessing earthquake hazards for major pipelines

Thirty years of terrain evaluation for route corridor engineering

Remote sensing for terrain evaluation and pipeline engineering

Pipeline engineering team's response to challenges of terrain and geology

Hazards in mountainous terrain: lessons for linear infrastructure from the Canadian forest industry

Aligning oil and gas pipelines through the Makarov Mountains, Sakhalin Island, Russia

Andean pipelines - a challenge for natural hazard and risk managers

Debris flow risk to pipeline facilities in mountainous terrain: a quantitative risk assessment approach

Terrain evaluation and site investigations for design of the trans-caucasus oil and gas pipelines in Georgia

Geohazard assessment of a major crude oil pipeline system: the Turkish section of the BTC pipeline route

The Sivas Karst - from terrain evaluation to ground truth

Use of terrain analysis as a basis for erosion risk assessment along pipeline rights-of-way: a case study from Georgia

Characterization of surface rupture hazards for BTC pipeline fault crossings, Turkey

Environmental impact assessment of large pipeline projects in remote environments: integrating engineering and environmental design

Understanding the dynamics of plant propagation and soil mechanics in the management of successful reinstatement

The case for early contractor involvement to minimise risks associated with routing and construction of pipeline projects

Terrain and geohazard challenges to pipelines in Canada

Modelling of frost heave of gas pipelines in Arctic conditions
Geotechnical engineering for landslide stability management along the trans-caucasus oil and gas pipelines at Kodiana Pass - Sakire in Georgia p. 428

Management of geohazards in the interest of owners and operators of onshore pipelines p. 446

Evolution of mountainous pipeline design in Colombia p. 459

Mitigation of fault crossing hazards for the AGT pipelines project through Azerbaijan and Georgia p. 468

AGT pipelines project overview - engineering, design and construction of significant river crossings in Azerbaijan and Georgia p. 480

Impact of eolian sand hazards on desert pipeline construction p. 492

Well field development in the Komi Republic, Russia p. 506

Pipeline insurance - technical aspects of underwriting and claims p. 517

In Salah Gas project, Algeria - part 3 : prediction and performance of large chain trenchers on a desert pipeline project p. 529

Pipelining in rugged terrain : costs, cost drivers and routing principles p. 549

The practicality of drilling very long pipelines under hazardous terrain - 5km, 10km? p. 565

Pipelines and peat : a review of peat formation, pipeline construction techniques and reinstatement options p. 576

Performance of chain trenchers in rock : database and prediction p. 596

Pipeline girth-weld joint corrosion protection : remote project field installation challenges p. 610

A summary of recent experience in the characterisation and remediation of peatlands p. 621

Pipelines and landslides in rugged terrain : a database, historic risks and pipeline vulnerability p. 641

Bridging the gap between field operations and risk management p. 660

Vegetation establishment and management for the restoration of pipeline rights-of-way p. 672

Performance management for site restoration in rugged terrain p. 687

Monitoring and analysis of the effects of ground movement on pipeline integrity p. 701

Towards automated monitoring of ground instability along pipelines p. 713
