Preface p. ix
Dedication p. xi

Historical Perspectives
The Heritage p. 3

Genesis of the Monte Carlo Algorithm for Statistical Mechanics p. 22

Editor's Note to "Proof of Validity of Monte Carlo Method for Canonical Averaging" by Marshall Rosenbluth p. 31

Proof of Validity of Monte Carlo Method for Canonical Averaging p. 32

A Brief History of the Use of the Metropolis Method at LANL in the 1950s p. 39

The Development of Cluster and Histogram Methods p. 45

The Early Days of Lattice Gauge Theory p. 52

Plenary Presentations

Biased Metropolis Sampling for Rugged Free Energy Landscapes p. 63

Overcoming the Limitation of Finite Size in Simulations: From the Phase Transition of the Ising Model to Polymers, Spin Glasses, etc. p. 74

Metropolis Methods for Quantum Monte Carlo Simulations p. 85

Biased Monte Carlo Methods p. 99

Simulating a Fundamental Theory of Nature p. 110

Markov Chain Monte Carlo in the Analysis of Single-Molecule Experimental Data p. 123

The Metropolis Monte Carlo Method in Statistical Physics p. 134

How to Convince Others? Monte Carlo Simulations of the Sznajd Model p. 147

Non-Local Updates for Quantum Monte Carlo Simulations p. 156

Focused Presentations

Generalized Monte Carlo Methods for Classical and Quantum Systems p. 173

Dilute Fermi Gases with Large Scattering Lengths: Atomic Gases and Neutron Matter p. 184

Monte Carlo Sampling in Path Space: Calculating Time Correlation Functions by Transforming Ensembles of Trajectories p. 192

Population Annealing and its Application to a Spin Glass p. 200

Path-Integral Renormalization Group Method p. 207

Large Spins, High Order Interaction, and Bosonic Problems p. 216

Cluster Algorithms: Beyond Suppression of Critical Slowing Down p. 225

What is the Best Way to Simulate an Equilibrium Classical Spin Model? p. 232

Algorithms for Faster and Larger Dynamic Metropolis Simulations p. 240

Metropolis Algorithms in Generalized Ensemble p. 248

Quantum Monte Carlo Simulations of Nuclei and Nuclear Reactions p. 261

Short Review of Recent Developments for Path Integral Techniques p. 269

Quantum Mode Coupling Theory and Path Integral Monte Carlo p. 281

Density-of-States Based Monte Carlo Techniques for Simulation of Proteins and Polymers p. 289

The Directed-Loop Algorithm p. 299

Adaptations of Metropolis Monte Carlo for Global Optimization in Treating Fluids, Crystals, and Structures of Peptides and Proteins p. 309
Effective Hamiltonian Approach and the Lattice Fixed Node Approximation p. 318
Monte Carlo Methods for Dissipative Quantum Systems p. 326
Exploring Energy Landscapes with Monte Carlo Methods p. 334
Transition Matrix Monte Carlo and Flat-Histogram Algorithm p. 344
Phase Switch Monte Carlo p. 349
New Cluster Algorithms Using the Broad Histogram Relation p. 356
Posters
Quasi-Fixed Points in Non-Equilibrium Field Theory p. 367
Improved Directed Loop Method for Quantum Monte Carlo Simulations p. 369
Fermion Monte Carlo Study of the Beryllium Atom p. 371
Chemical Reactions in Highly Non-Ideal Environments: Reactive Monte Carlo Simulations p. 374
Estimate of the Positron-Electron Annihilation Rate p. 376
Metropolis with Noise: The Penalty Method p. 378
Exploring the Perovskite Landscape p. 380
Dynamics of a Polymer Chain in a Melt p. 382
Confined Polymers in a Strip p. 384
Simulation Methods for Self-Assembled Polymers and Rings p. 386
Density of States Simulations of Proteins, Liquid Crystals, and DNA p. 388
Liquid-Solid Transition in Nuclei of Protein Crystals p. 390
Directed-Loop Equations for the 2D XY-Model with Ring Exchange in a Magnetic Field p. 392
Scale Mixture Models with Applications to Bayesian Inference p. 394
Monte Carlo Method for Real-Time Path Integration p. 396
Neural Network Approach in Computer Simulations p. 398
Optimality of Wang-Landau Sampling and Performance Limitations of Flat Histogram Method p. 400
Flat Histogram Methods for Quantum Systems p. 402
Variational Monte Carlo Study of a Spin-1/2 Heisenberg Antiferromagnet in Magnetic Fields p. 404
Exploring Protein Folding Free Energy Landscape: Replica Exchange Monte Carlo p. 406
Registrants p. 409
Agenda p. 411
Author Index p. 415
