A Lagrangian approach to wavefunction engineering of layered quantum semiconductor structures

Dependence of band-offset on Sb content in AlGaAs/GaAsSb quantum wells grown on GaAs by MBE

Band alignment analysis of strained GaAsSb/InGaAs quantum wells

Fabrication of self-assembled nanodots at arbitrary locations by spatially controlled implant source growth

Anomalous current leakage and depletion width control in nanometer scale Schottky gates formed on AlGaAs/GaAs surface

Nonlinear variable capacitance characteristics in GaInP/GaAs triple barrier resonant tunneling diodes

Single electron transistors using single self-assembled InAs quantum dots

70 nm InGaAs/InAlAs/GaAs metamorphic HEMTs for high frequency applications

Two-stage high gain W-band amplifier using metamorphic HEMT technology

Improved breakdown voltage and output conductance characteristics of GaAs pHEMTs using composite gate fabricated by digital recess method

High performance 0.1 [mu]m GaAs PHEMT with Si pulse doped cap layer for 77GHz car radar

Development of a highly-reliable over 200 W GaN-HEMT power amplifier

High speed InP HBT driver IC for laser modulations

(GaIn)(NAsSb) : the challenges for long wavelength communications devices

Ultra-high speed internal RF-gain InGaAs/InAlAs avalanche photodetector

Very high sensitivity operation in quantum dot infrared photodetectors

RF-enhanced InGaAs/InAlAs uni-traveling-carrier photodetector

Terahertz-wave generation using GaSe crystals with different carrier densities

Physical aspects of high-power semiconductor lasers

Spontaneous recombination lifetime in compressively strained InGaAs and InGaP quantum well lasers grown on GaAs substrates

Surface-emitting and edge-emitting Mid-IR photonic-crystal distributed-feedback lasers

Room temperature operation of InGaAs/InGaAsP/InP quantum dot lasers grown by MOCVD

Nanostructured optoelectronic devices : photonic crystals and microcavities

Characterization of all-optical modulation due to intersubband transition in a ridge waveguide with GaN/AlN quantum wells

Ultrafast optical gate switch of AlGaAs/AlAs multi-layer structure using enhanced nonlinear response at two-photon resonance

Comparative study of static and dynamic d-type flip-flop circuits using InP HBT's

Spin dependent carrier transport across nonmagnetic p-n heterojunction : the first step for the realization of circularly polarized photodiodes

Spin dependent transport in hybrid magnetic tunnel junctions

Magnetization dependent photoconductivity of Ga[1-x]Mn[x]As/ZnSe diode structures

Spins free of charge : all-optical control of spin in GaAs

Effect of carbon co-doping on III-As based diluted magnetic semiconductors
Tailoring of the structure and magnetic properties of \( \alpha \)-MnAs spin injection layers on GaAs(001)  
Heusler half-metals on GaAs for spin injection  
Ferromagnetic GaSb/InAs-based materials and MnAs thin films for spintronics applications  
GaN-based diluted magnetic semiconductors for spintronics  
Ferromagnetic properties of Gd doped GaN  
Split gate hall effect devices  
Fabrication of self-organized GaInNAs quantum dots on GaAs (311)B by atomic hydrogen-assisted RF- molecular beam epitaxy  
Force/displacement detection using quantum effects in InAs/Al[0.5]Ga[0.5]Sb two-dimensional electron systems  
Self-consistent analysis of electron transport properties in quantum wires  
Insulator-quantum hall transitions in a two-dimensional electron gas using self-assembled InAs dots  
Excitonic diamagnetic shift and oscillating Zeeman splitting in quantum wire: magneto-photoluminescence study  
AlGaAs/InGaAs PHEMT with multiple quantum wire channels  
20 Gbps operation of RTD/HBT MOBILE (MOnostable Bistable Logic Element) IC based on InP technology  
Speed-power performances of quantum wire switches controlled by nanometer-scale Schottky wrap gates for GaAs based hexagonal BDD quantum LSIs  
FDTD analysis of the self-aligned total internal reflection mirrors for micro-ring cavity resonators  
40Gbps waveguide photodiode with responsivity more than 1.0A/W, large alignment tolerance, and high saturation current  
The crystal growth of GaN on MOCVD-deposited GaN by the method of sublimation  
Surface morphologies of AlGaN films and AlGaN/GaN heterostructures on vicinal sapphire (0001) substrates grown by rf-MBE  
Growth and characterization of high in composition InGaN epilayers by rf-MBE  
Cubic InN growth on R-plane (1012) sapphire by ECR-MBE  
AlGaN/GaN hetero-structure on GaN templates with high Al composition and low resistance by RF-MBE  
High quality AlGaN/AlN superlattices grown on AlN/sapphire template by MOVPE  
Effect of Si doping to the (1-101)GaN grown on a 7 degree off oriented (001)Si by selective MOVPE  
Defect control in Ga(In)NAs films grown by atomic H assisted RF-MBE  
Electrical properties in hexagonal InN thin films  
Optical phonon dephasing channels in GaN revealed by the coherent phonon method  
Performance enhancement by using the n'-GaN cap layer and gate recess technology on the AlGaN/GaN HEMTs fabrication  
Electron traps in AlGaN/GaN MIS-HEMTs observed by drain current DLTS  
Surface potential transient of AlGaN/GaN HEMTs measured by Kelvin probe force microscopy  
AlGaN/GaN MIS-HEMTs with ZrO[2] gate insulator  
Self-heating effect study of AlGaN/GaN HEMT using pulsed IVT on the isothermal conditions
Power performance enhancement of metamorphic In\textsubscript{0.3}Al\textsubscript{0.7}As/In\textsubscript{0.45}Ga\textsubscript{0.55}As HEMTs using pseudomorphic channel design

Highly reflective and crack-free Si-doped AlN/GaN distributed Bragg reflectors grown on 6H-SiC(0001) by molecular beam epitaxy

High power InGaN/GaN flip-chip blue and white LED

High power AlInGaN-based multi-quantum well laser diode with low operating current

Crack-free ZnO layer growth on glass substrates by MgO-buffer layer

Effect of ambient gases on structural and optical characteristics of post annealed ZnO films

Activation of group-I acceptors by hydrogen codoping in ZnO

Optical properties of cubic MgZnO thin films

Parameters required to simulate electric characteristics of SiC devices

Enhancement of ionization efficiency of acceptors by their excited states in heavily doped wide bandgap semiconductors

High extraction efficiency light-emitting-diodes using hemispherical corrugated interface substrate

Transconductance linearity improvement of E-pHEMT at high Vgs

First-principles investigations of Ga and As adsorption properties on a GaAs(110) surface

Development of plasma-free etch chemistry to realize defect-free GaAs micromechanical resonator structures

Patterned InGaAs quantum dots by selective area MOCVD

Growth of AlGaN on Al\textsubscript{2}[\textsubscript{2}]O\textsubscript{3} substrates by mixed-source HVPE

CrN buffer layer study for GaN growth using molecular beam epitaxy(MBE)

Growth and characterization of HVPE GaN on c-sapphire with CrN buffer layer

Doping of GaN, AlGaInN by mixed-source HVPE

Investigation of thermal degradation on structural and optical qualities of InGaN/GaN MQWs

Low threshold current GaInNAs QW LD with InGaAs/GaNAs barriers

The effect of surface treatment on zinc oxide

Photoluminescence study of ZnO thin films deposited by pulsed laser ablation

Photoluminescence from single hexagonal nano-wire grown by selective area MOVPE

Diluted semiconductors formed from energetic beams

A new GaAs MOS varactor fabricated using a low-cost GaAs oxidation technology

Measurements for nanocrystals in silicon deposited by rf-magnetron sputtering

Structure properties and phase evolution of Mg\textsubscript{x}Zn\textsubscript{1-x}O layers grown on c-sapphire by P-MBE

Bi-induced phonons in GaAs\textsubscript{1-x}Bi\textsubscript{x}

Temporal behavior of absorption changes and yellow luminescence in thin InGaN epiayers

High-energy photoemission studies of transition metal ion doped III-V nitrides

Strain effect on energy band of InAs/InP quantum dots by GaAs layer insertion

Electron-hole separation in InAs quantum dots
Spin relaxation in charged InAs/GaAs quantum dots

Anti-parallel spin interaction between the carriers in coupled quantum dots

Raman study of biaxial strain in InGaN-GaN self-assembled quantum dots grown on sapphire (0001)

Optical properties of II-VI-based magnetic semiconductor self-assembled quantum dots

Interpretation of leakage current in Ni/n-(Al)GaN Schottky structures and its influence on surface preparation conditions

An analysis of the kink phenomena at lower drain current in GaAs-based short-gate MHEMTs using the hydrodynamic transport simulation

Demonstration of the formation of GaAs homojunction far-infrared detection by reflection measurements

Observation of optical fano resonance by measuring PL spectrum of ZnS:Mn/SiO$_2$ 1D photonic crystal

Interface analysis for CdMgTe and AlGaAs multilayer systems using ellipsometric method

Imaging spectroscopic ellipsometry study on TFT-LCD device structures

On the hole migration through DNA
